Average:	193,710	589	2.14	\$3,751.43	25,331	2848	11.27	\$29,837.00	\$36,724.25

* estimates based on extrapolating licensing data for January 2015 -October 2015, updated population estimates not yet available, so used 2014 population

** estimates based on the actual number of licenses sold - this will not add up to the total revenue collected (column J). Total revenue collected is based on what the licensing office actually collects. Depending on when fees are submitted, the license could be sold in one year, but the fee collected in another year. This is especially true with licenses purchased through veterinarians' offices.
