Comments may also be faxed to... (573) 874-7266
or forwarded via E-mail to... pubw@CoMo.gov
(please include "Sinclair & Route K Roundabout" in the subject line and provide your name and contact information.)

Please send comments by May 23, 2019. Thank you for your input!

Comments:

- Please consider maintaining the bike lane/shoulder on R to K through the roundabout
 - concerns for biker safety + speed ~~of~~ of cars entering roundabout w/ loss visibility from the hill on R to K
 - if you need to get rid of dirt and you are allowed to give it to me, I would welcome some dump truck loads delivered to ~~the~~ my back yard
 - love if you considered putting a drain pipe in my ditch and leveling it off to help w/ mowing + making it look nicer (a wish)
- There is more space on the back of this form.*

Comments: *I am owner of 6991 Sinclair. This roundabout is essentially in our front yard. Our second driveway - to the blue barn - needs to retain access (it is gravel, not paved).*

My biggest concern is water run-off, standing water, frequent (weekly!) mowing of land that will now be part of my front yard. It needs to be mowed on a residential yard mowing schedule, not as road maintenance. If the land is relinquished to our ownership, it must be dry enough ^(over) There is more space on the back of this form.

This was a question.

1. Limit tree removal.
2. Can plant new trees
3. Drainage concerns
4. Bike paths on street.
5. 2nd driveway on Peppmiller
6. Don't like water quality w/d
7. Check with cascade conducti
8. Maintenance on Rtes R,
after roundabouts
9. Would an arborist be
interested in the tree removal
situation.
10. Maintenance of property
in front of Peppmiller is
a concern.
11. Look at traffic of other
projects. Look at closures
and detours.
12. Put on website drawing.

Re: Sinclair roundabout

Dear Allison Anderson,

The board of the Cascades Homeowners Association would like to comment on the proposed Sinclair Roundabout.

1. We request that the proposed Sinclair Road improvements begin its curve farther east and farther south so as to minimize the impact on homes that backup to Sinclair. We request that the trees be preserved as a buffer to protect the homes from road noises and potential light pollution. Beginning it farther east and south would also provide a better margin of safety for children and families that use the walking trail.
2. We request that the lights being installed be in keeping with the character of the residential area, and be physically short and of low lumens so as not to shine into the homes that backup to Route K.
3. There is a significant water drainage issue beginning just south of the Cascades entrance at Bellingham. The water drainage is on BOTH sides of the tree line. Therefore, we request that City engineers work with the Columbia Area Management company and the HOA in order to suss out the cause of the water issues and work on ways for the road construction to be part of the solution.

Thank you for the consideration,

Kristi Powell
President
Cascades Home Owners Association

Sinclair & Route K Roundabout On Line Comments:

Public Works,

I own and live in the Cascades home that lies closest to the intersection of Sinclair and Route K. I recently attended the public meeting regarding the preliminary plan for the relocation of south Sinclair and the construction of a roundabout at Route K, and I wanted to provide comments.

1. I would very much like to see the relocated Sinclair road begin its curve eastward further south, so as to minimize the impact to my property and to the neighborhood walking trail. The current proposal shows the new road in very close proximity to the walking trail, and shows the buffer of trees between the trail and the road eliminated. At the meeting, we were told that the new road, as currently depicted, could be as close as 24 feet from the walking trail. For safety and aesthetic reasons, I would like to preserve this tree buffer and not have the new road begin so close to the walking trail. The tree buffer shields my property from the road. Cars drive very fast up and down Sinclair—they like to hit the gas as they turn off of Route K and speed north. I have young children, and they play in my backyard and ride bikes on the walking trail (along with lots of other families and kids in the neighborhood). The idea that the road will be so close to the trail and my backyard, with no trees in between, is very alarming. I would ask that the buffer of trees please, please be preserved and that the relocated Sinclair begin further south of my property, alongside the park (where the trail is much further from the road).
2. The preliminary plan calls for the roundabout to be lighted, but no detail is provided as to the lighting. I know that lighting is required so that drivers can see and navigate the roundabout, but I want to stress that this is a residential area. I would like to see the lighting designed to minimize light pollution and be in keeping with the residential character of the area.

Thank you,

Amanda Miller

Hi there,

I live in the Cascades neighborhood and my house backs up to Sinclair Road. I wanted to express some concerns about the proposed changes to Sinclair and the new round-about.

The current design shows the relocation beginning near the Cascades walking trail as it runs along Sinclair, and the removal of buffer trees between the walking trail and the road. I watch as families, kids, and people of all ages walk and bike on our trail daily. Having the road so close to our trail concerns me for their safety, as well as, the increased noise and the removal of trees. I would like to see the relocation of Sinclair begin further south, where the walking trail is further from the road, and would like the buffer trees between the trail and Sinclair preserved as much as possible.

I also have concerns about water drainage in the area. My neighbors and I have had unprecedented amounts of standing water in our yards that has backed up from the Sinclair easement this year. There is no where for the water to drain and south Sinclair itself is often partially covered by water. This has caused a safety issue on our walking trail as slippery moss

now covers it and children and adults fall regularly (I see them out my window!). Our yard and several neighbor's yards is almost impossible to mow in certain areas right now. I'm also concerned about a growing mosquito infestation because of standing water. Please make sure the road changes and any tree removal won't make this issue worse. Are there ways to actually improve the drainage with the road design?

Thank you for considering our concerns,
Rachel Tiemeyer

I like the current plan (proposal #1) for this roundabout and am glad it's being done as the opening of the new school will greatly increase traffic. At some point, Sinclair road will need to be widened.

john bennett

I think there are more places in need of a roundabout. For example, the road off of Rt. k and Old Plank, bear the new gas station. There are tons of accidents there ! I live in the gates on old plank and don't see a problem with Sinclair, old plank and route k. I recommend above and also paving the decaying road on old plank too!

Amanda Toepk

As a resident of the Oak Park neighborhood and frequent traveler on both Sinclair and Old Plank, I am of the opinion that the intersection does NOT need any improvement at this time, especially for \$1 million+. The traffic turning onto/from Sinclair or Old Plank from K is never backed up, and there is more than enough visibility to slow down if traffic does slow down. I also can't see the logic why re-aligning Sinclair/Old Plank would be beneficial, as those going Northwest would likely take Scott Blvd and those going Northeast would likely take K/Providence. In actuality, the roundabout would significantly limit traffic speed down Route K without any additional benefit to those coming/going from Sinclair or Old Plank. I believe a MUCH better use of the funds (along with likely additional/future funds) would be turning Providence and K into four lanes until at least Hill Creek Rd. Recurrent issues I've encountered include 3-4 dozen cars lined up at the 163/Providence light EVERY MORNING from 7-9am (perhaps a roundabout would be better here?). Also, cars turning left from southbound K onto Hill Creek stop traffic routinely, with no way to go around with only a 2-lane road. 4 lanes would VASTLY improve the danger zone that is the 4-->2 lane transition on South Providence where a daily wreck is expected. Based on utility alone, I'd be shocked to see a roundabout put in at Sinclair/Old Plank. But including the cost of \$1.2 million, it would be irresponsible of Public Works to proceed. Thanks for taking the time to read, and I'd highly recommend a utilization study prior to any construction.

Blake Welschmeyer

The intersection of K and Old Plank is much more dangerous. Put it there instead of on K and Sinclair. I've lived here for 20 years and have seen many bad wrecks at Old Plank and K. The increased traffic has also lead to excessive speeding by many.

James Aldridge

Is there a plan to address the grade of the hill west of this proposed roundabout? While I understand how a roundabout could potentially alleviate traffic when the new middle school is open I do have concerns about a roundabout at the bottom of a steep hill during inclement weather. This hill is already problematic when there is snow/ice on the roads. In order to make it up the hill traveling west you need to have a little momentum to not slide back down or let your tires spin. Also, when traveling down the hill or east I think that sliding directly into a roundabout could be dangerous for traffic. Please share the plans you have to address this roundabout and snow/ice.

Kylene

I agree that the Roundabout is a good idea. I live in Smith Hatchery road and there is no good alternate route to get into town. What is your proposed route for people on Old a Plank and Smith Hatchery while this work is being done? How long will the work take?

Mary DeFroy

I love roundabouts!! My only suggestion would be to budget for ad and social media post about the rules of roundabouts. I think the more education people receive would improve people's perceptions and increase safety!

Kelly MacNevin

I believe a roundabout will be beneficial for two reasons: will improve safety and reduce the speed for travelers on that road and improve traffic flow. I hope this project can move forward with no issues.

Jered Bare

I like the moving of Sinclair to align with Old Plank, however I worry about traffic coming from the west over the hill and there being accidents.

ASHLEY BROWN

Support

Jon Law Hardin

There are plenty of places for a traffic circle. Out in the country along a rural highway that actually functions as a highway from a community (McBaine) is not one of them.
