Re: Right of Use Permit
School of Music- Utilities
MU Project # CP170621 & CP1702801

Dear Mr. Kapila,

On behalf of the University of Missouri, I would like to formally request that the City of Columbia approve the installation of new hot water distribution pipe, chilled water distribution pipe, control conduit, domestic water pipe, storm sewer, electric ductbank and electric manhole in city right of way. Attached is a diagram that further describes the proposed utilities.

The following utility installations are planned within city right of way:

- A 2'x3' electrical ductbank starting at the intersection of University Avenue and Hitt Street and extending north into the northbound lane of Hitt Street to the south entrance of Hitt Street Parking Garage. A new electrical manhole will be installed in the alignment approximately 250' north of the University Avenue intersection.
- Two 10" hot water lines (supply and return), starting at the Northeast corner of Middlebush Hall and extending north to the westbound lane of University Avenue, the lines will run east to roughly 50' past the intersection of Hitt and University and then will turn north, crossing University Avenue to serve the new School of Music Building.
- A new 6" water and two new 12" chilled water lines with control conduit will be installed starting at the southeast corner of Hitt and University and extending north, crossing University Avenue to serve the new School of Music Building.
- A new storm inlet and 18" Storm Sewer will be installed at the northeast corner of University Avenue and Hitt Street.

Sincerely,

Jennifer Sullivan, P.E.
Project Manager, Campus Facilities
