REBATES: AIR CONDITIONER/HEAT PUMP

Columbia Water & Light

You can make a BIG difference!

Columbia Water & Light encourages the efficient use of electricity because it can make a big difference for all of us. For you, the immediate benefit is saving money and having a more comfortable home. For the utility, research has shown that it is cheaper for us to "buy" efficiency than it is to produce electricity. This helps your rates stay low. **Energy efficiency is good for you and it's good for Columbia.**

Time for an upgrade?

As much as half of the energy used in your home can go to keeping it heated or cooled. If your cooling system is older than 10 years, you have frequent service problems and/or you see your utility bills going up, it is time to consider installing a new unit.

NOTE— Check the AHRI Directory for SEER rating confirmation before completing the purchase of a new unit. Sometimes the manufacturer's SEER rating can be rated higher than the unit can perform.

Residential electric customers can receive a \$50 to \$1600 rebate for installing a high efficiency air conditioner or air source heat pump.

Participation Steps

The rebate application form and receipts must be submitted to Columbia Water & Light within six months of the air conditioner unit's installation. Customers with incomplete or incorrect applications will have 30 days to provide the correct information or risk losing their place in the rebate funding process.

Rebates are offered on a first-come, first-served basis as funding is available each fiscal year. Columbia Water & Light reserves the right to inspect the installed equipment before the rebate payment is issued.

Columbia Water & Light reserves the right to deny a rebate for a unit that is oversized for a building.

Air Conditioner/Heat Pump Rebate Chart

A.C. SEER	H.P. SEER	1 TON	1.5 TON	2 TON	2.5 TON	3 TON	3.5 TON	4 TON	5 TON
14	*	\$50	\$75	\$100	\$100	\$100	\$150	\$200	\$300
