- I support Option 1 utilizing a climbing bike lane, and speed hump
- I support Option 2 utilizing speed tables and speed humps
- I support Option 3 utilizing speed humps, a climbing bike lane, & 3 crosswalks
- I support Other (describe in comments)
- I do NOT support traffic calming being install on Stewart Road

We are accepting comments until March 17, 2017. Thank you for your input!

Comments:

I would prefer speed tables over speed humps.

If bike lanes are used please only paint, no poles!

Comments:

I support the use of speed tables over speed hump when possible. I am ok with the climbing bike lane if it is delineated with road markings ONLY, I do not support the use of traffic cones. I am also ok with the "sharrows". Thanks.

To: <pubw@como.gov>

I bike and drive Stewart road. No need for humps, bumps, or vast expenditures. If absolutely something is required to calm the users, I suggest " share the road " signs. Also please ticket bikers without lights at night. Thank you Rick Shanker 573-875-2035

Comments: _____

I feel bike lanes and crosswalks are important because it encourages the use of alternative forms of transportation. Many people from these areas are able to walk and bike to work and should feel safe and supported to do so. The addition of speed humps will help slow down and possibly reduce through traffic from the area.

Comments:

I would prefer to narrow the traffic lane to 10-ft and definitely support separated bike lanes for both east and west bound traffic. This will allow bikers to get up those hills and allow vehicles to safely pass them without holding up traffic. I ride that now and it's really dangerous at rush hour with cars trying to pass. I know of several neighbors of mine that ride if they felt safer on Stewart. It feels like there's a lot more rush hour traffic on Stewart--maybe due to Broadway getting backed up?

Comments:

I support only bike lane in both sides, that should be enough to slow traffic.
Crosswalks there can be dangerous.

Comments:

Please consider in either option adding a crosswalk at W. Parkway Dr and moving the speed table from Thilly to the intersection of W. Parkway in "Option 2". Furthermore if "option 1" were preferred please eliminate the speed hump before Edgewood (east of). I am concerned drivers will cut down W. Parkway^(N) to avoid the speed bump.

Stewart Road Options?

2 messages

Materer, Timothy J. <MatererT@missouri.edu>
To: "lwwhite@gocolumbiamo.com" <lwwhite@gocolumbiamo.com>

Fri, Feb 10, 2017 at 8:24 AM

To : Lee White, Traffic Engineer

Thank you for the meeting last night. I appreciate the care and research the city has put into the Stewart Road project. But I was confused about what was in Options 1 and 2.

I thought Option 1 included a number of traffic tables (or humps, or bumps, etc.). But by the end of the meeting it sounded like Option 1 meant a "climbing" bike lane and only one traffic slowing area. If so, I don't like this option. Also, having biked on Stewart for 40 years, I'm not impressed with a bike lane on only one side of the street. I think the term "climbing bike lane" is a misnomer and it should be called a single bike lane. And I don't see how a bike lane would really slow traffic on the downhill side into the university, though as you point out it would make the street narrower for car traffic.

So, as far as I can see now, I prefer Option 2, and like the suggestion of something at W. Parkway (and Westmount) to facilitate entry into the park.

Good luck, Tim Materer, 502 W. Stewart

Lee White <lee.white@como.gov>
To: "Materer, Timothy J." <MatererT@missouri.edu>

Fri, Feb 10, 2017 at 10:01 AM

Tim,

Thanks you. It's always nice to hear kind words after a meeting, because sometimes that's not always the case.

I have attached both options just for clarification.

Option 1:

Climbing Bike Lane with transitions at Edgewood, Westwood, Glenwood, Lindell
Crosswalk @ Edgewood
Speed Hump near Edgewood

Option 2:

Speed Table at Thilly
Speed Table at Westwood
Speed Table at Lindell
Speed Hump near Edgewood
Crosswalk @ Edgewood

The climbing bike lane was to serve two purposes. 1. Provide a bike facility on the uphill portion of the road. 2. Create a chicaning effect since the centerline of the road would change throughout the road, slowing the traffic.

I appreciate the input and will be certain to take it into consideration.

Thanks,

Lee White, PE, PTOE
City of Columbia, Public Works

While I was unable to attend the meeting last week, I was on the mailing list for all the subsequent emails between you and Tim Materer. I wish to address one point that you made in an email to Tim.

"Create a chicaning effect since the centerline of the road would change throughout the road, slowing the traffic. "

I feel fairly confident in predicting that this would not occur. I go to my company (in the MU Research Park) by going down West to Stadium. Cars regularly go over the line into the bike lane (on the south bound side) since this gives them more room on their side of the road. Disregarding the center lane also happens on S. Providence, at the turn in the road where it crosses Rollins (going north). One needs to shift right to stay within the proper lane. A huge percent of vehicles (including large trucks) cross the double line, entering into the south bound left turn lane. So why would anyone believe in a chicaning effect on W. Stewart?

Sincerely,

Ken Gruber

Stewart Road Calming Options

2 messages

Charlie Triplett <charlietriplett@gmail.com>
To: lee.white@como.gov

Mon, Feb 13, 2017 at 2:08 PM

Hi Lee,

Thank you for your work on Stewart traffic calming. It's a beautiful street for biking and walking but it does seem to carry a lot of higher speed cut-through traffic.

I've been looking at your options for Stewart traffic calming. Like many others, I cycle and walk Stewart to travel to/from the campus area. I'd really like to see our city's first **protected bike lanes** on Stewart which, in themselves, would be a traffic calming measure that alerts motorists into paying attention to their surroundings and urges voluntary caution.

I hope to see an alternating protected bike lane as an option.

stewart road

2 messages

Kerwin, William J. <KerwinW@missouri.edu>
To: "lee.white@como.gov" <lee.white@como.gov>

Sat, Feb 18, 2017 at 10:32 AM

Hello Lee White,

My name is Bill Kerwin, I live on West Lathrop Road, and I bike to and from campus just about every day. Thank you for doing something to slow down traffic a bit.

I definitely favor option 2, and actively dislike option 1. I don't know what a 'chicaning effect' is, but I think the idea of a bike lane that shifts back and forth across a busy street is, well, not smart. Not smart at all. I would be tempted to ignore it, and stay in the pseudo bike lane that already exists. You would have bikes going in both directions on one side of the road? And, to repeat myself, you want those of us on bikes to cross over? No thank you.

again, thanks for considering options,

Bill

Lee White <lee.white@como.gov>
To: "Kerwin, William J." <KerwinW@missouri.edu>

Sat, Feb 18, 2017 at 10:43 AM

Bill,

Thank you for the feedback. I would like to clarify the climbing bike lane. Bikes traveling eastbound will always stay on the right hand side of the road as well as westbound bikes stay on the right hand side of the road. The idea is to give the bikes going up a hill (when they are traveling the slowest) a bike lane. This will allow the bike to have a dedicated space on the road while going up hill as well as make passing bikes easier for cars. When bikes are going down hill they will share the lane with cars as they do now.

I'd be glad to discuss further if you have any other questions.

Thanks,

Subject: [PubW]: Stewart Road Traffic Calming...

To: "pubw@como.gov" <pubw@como.gov>

Thanks for meeting with us this week and for looking into solutions for traffic on Stewart. I wanted to indicate that we STRONGLY support any traffic calming measures. I know you guys have the data to indicate how bad it is, but some people just fly down the road. We have 3 children ages 10, 6, & 4, and have constructed a fence to keep them from running into the street, but it is still very disconcerting, nonetheless. I believe Mr Lee White indicated he believed a Speed Table was in his opinion was the best option. I am all for whatever he thinks would be best as long as something can be done. In addition, any thoughts on 'Kid Friendly' signs?

Also I was a little confused about the data that Mr White gave us regarding speeding...39 MPH 85 percentile...can you clarify what that represents. Thanks for everything!!

We are accepting comments until March 17, 2017. Thank you for your input!

Comments: I don't support speed humps, bumps or tables on this road. I'm fine with a climbing bike lane and/or signs that show a ^{the} no speed a motorist is traveling. Building these obstacles into this type of artery seems extreme, and sets a dangerous precedent for other "traffic calming" projects.

There is more space on the back of this form.

Comments:

I am not aware of a bike or pedestrian problem on Stewart. I rarely see either & I use Stewart a lot! It's nice to have a through-way street! Perhaps residents feel differently, but that's my opinion.

Comments:

Personally I don't feel like speed bumps are effective and favor no bumps or a limited plan like option 1.

Comments:

I think the climbing bike lane is dangerous - both to bikers switching sides, and to cars. The motor vehicle traffic is best served going STRAIGHT. Stewart Rd. carries too much traffic to add confusion into the mix.

Comments: I commute daily on Stewart Rd.
I frequently encounter people driving on Stewart Road
>40 miles per hour. It seems like madness that
people need to be told this should be a "No Passing"
street, but I see too much of that, as well.

I strongly endorse any plan which will improve safety by slowing traffic to posted speed limits.

Comments:

I've lived near Stewart Road for 14 yrs. and use that particular stretch each and every day in some form or another (getting to and from work on campus via Edgewood to Stewart, taking kids to and from school and extracurricular activities at Grant, walking school bus, going to the library, biking as a family, walking our dog). I have not observed any major traffic issues and certainly not anything extreme enough to warrant THREE speed humps and THREE crosswalks in the space of a few blocks. In fact, the only times I can recall seeing that amount of speed calming is in parking lots. (cont'd on page 2)

Comments:

While I support option 3, I am concerned that this will inadvertently increase thru traffic in the surrounding more residential streets. I have no evidence for this but I already suspect that people are cutting through residential areas to avoid traffic on West/Stewart/Broadway + that the calming project will further exacerbate this. I hope that option 3

could be recommended to include the posting of signage stating that there is "no thru traffic" ~~on the~~ on the residential streets where they intersect w/ West, Stewart, & Broadway Roads. While the calming project will undoubtedly make Stewart Rd safer, it could also negatively affect the safety of surrounding streets by people cutting ^{through} hoping to avoid traffic, speed bumps, bicyclists, etc.
