Introduction

Each year, City staff work with the Mayor and City Council to develop a budget that reflects the priorities of our community. While the Council establishes the City's policy priorities, those decisions are also informed by the voices of our residents through opportunities like our annual Community Survey, the annual Community Summit, and ongoing budget engagement opportunities throughout the year. Community input is central to everything we do, and this budget reflects the values and priorities shared by the people we serve.

At the core of local government is a simple responsibility: to deliver the services that improve the quality of life for our community. The City of Columbia is a full-service city, providing far more services than many municipalities across the country. In addition to electric, water, sewer, stormwater and solid waste utility services, the City operates a fare-free bus system, the Columbia Regional Airport, rail and transload operations, public health services, a total of 79 parks and a number of recreation facilities, and public safety departments, among other services. Each plays an important role in supporting the quality of life our residents expect while helping our community continue to thrive.

As Columbia continues to grow, so do the demands placed on our organization. We are seeing increased needs for housing, infrastructure and public safety while continuing to invest in our employees, who are the backbone of every service we provide. Meeting these needs requires thoughtful planning and responsible stewardship, particularly at a time when projected revenues are not keeping pace with rising costs.

With 20 departments, approximately 1,600 employees and a budget of over \$600 million, the City must carefully balance available resources while continuing to provide the essential services our residents expect. The budget that follows outlines how those resources are organized across the City's various funds and how each plays a role in supporting the programs and services that keep Columbia moving forward.

Understanding Our Budget

The City of Columbia's annual budget is a document that outlines the priorities for the upcoming fiscal year. This comprehensive document allows residents the opportunity to review how City funds are being utilized to support the functions of government and the priorities outlined by Columbia residents and City Council representatives.

Each year, the City of Columbia's Finance Department strives to create a document that adheres to the highest principles of governmental accounting and modern municipal budgeting, enabling the City to manage resources effectively and helping residents better understand how the City allocates resources to provide services. This is reflected in the fact that the City has received the Distinguished Budget Presentation Award from the Government Finance Officers Association for 29 consecutive years.

It is important that residents are equipped with knowledge about how the City's budget is formed. The following information forms an important context around how our City's budget operates.

Each year, the City's fiscal year runs from Oct. 1 through Sept. 30. The City Council approves the budget, which is proposed by the City Manager, to go into effect Oct. 1. Residents can participate in two public hearings before the budget is approved, which allows them the opportunity to express opinions or concerns.

The City's budget is made up of six different fund types:

1. General Fund
2. Enterprise Funds
3. Internal Service Funds
4. Special Revenue Funds
5. Debt Service Funds
6. Capital Projects Fund

General Fund

This is one of the City's largest funds and is made up of what you typically think of when you think of local government. General Fund revenue doesn't have the same restrictions that other funds have. It can be used for a variety of purposes. The largest expense in the General Fund is personnel, and the largest functional group is public safety.

Enterprise Funds

Enterprise Funds are used to provide services to the public on a user-charged basis. Examples include utility bills paid by utility customers. Funds from those bills can only be utilized to provide those services.

The revenue generated by these funds covers maintenance, operation, and upkeep. As these are enterprise funds for a public entity, they are not designed to make a profit. They only generate enough revenue to cover the needs of the services they provide.

Internal Service Funds

Internal Service Funds are used to account for goods and services provided by one department to others, on a cost reimbursement basis. These costs are typically paid in the form of monthly fees or one-time transfers from the departments receiving service to the department providing it. An example of this would be the City's Fleet division, which provides maintenance to City-owned vehicles for all City departments.

Special Revenue Funds

These are funds that account for specific revenues that are legally restricted to particular purposes. Examples include revenue from the voter-approved Parks Sales Tax, which can only go to Parks and Recreation operations and projects.

Debt Service Funds

Debt Service Funds account for the resources, financing and expenditures related to long-term debt for the governmental funds.

Capital Project Fund

This fund is used to account for the acquisition and construction of major capital facilities or improvements within the general government funds.

Priorities for Fiscal Year 2027

Each year, the Mayor and City Council identify priorities that help guide the development of the City's budget. These priorities are informed by a variety of factors, including community feedback, engagement opportunities, insights from City staff and the ongoing needs of our residents.

The Fiscal Year 2027 (FY27) budget focuses on the following priority areas:

- City Employees
- Public Safety
- Affordable Housing
- Resilient Economy

While these priorities provide a framework for budget decisions, they are part of a larger commitment to maintaining the full range of services provided by the City. Every department plays an important role in supporting the community, and continued investment across all areas of City government remains essential to meeting the needs of our residents.

City Employees

Over the past four years, the City has invested in its workforce through initiatives like the comprehensive classification and compensation study, which reviewed salaries across the organization and helped establish a goal of leading the market with competitive wages and benefits. These efforts have increased applicant numbers and improved retention, helping Columbia become an employer of choice in a competitive labor market.

Although the FY27 budget presented significant financial challenges, we have remained committed to employees. The FY27 budget includes a 3% wage increase, reaffirming that our workforce remains a top priority of the City Council and City management.

The City also worked to minimize increases in benefit costs for employees. A restructuring of family health insurance plans resulted in decreased employee costs across all three family coverage options, while dental premiums increased modestly and vision rates remained unchanged. These efforts reflect the City's continued commitment to supporting employees while responsibly managing public resources.

Public Safety

A safe community remains essential to Columbia's continued growth and success. The FY27 budget includes increases for both Police and Fire that are independent of the proposed General Sales and Use Tax Dedicated to Public Safety. These investments ensure our public safety departments have the resources necessary to meet the needs of a growing community.

For the Police Department, the budget includes funding to purchase protective equipment and establish a dedicated inventory for the Police Academy, ensuring recruits have the equipment needed for quality training.

The budget also continues support for the Block by Block Safety Ambassador Program that started in FY26, an initiative developed through collaboration between The District, the City of Columbia and the University of Missouri to provide additional support for downtown safety efforts. Safety Ambassadors provide a visible presence during some of the busiest hours, helping identify concerns, connect individuals with available resources and support a safe and welcoming environment. The program complements the work of the Columbia Police Department by providing additional support in the community while allowing law enforcement to continue focusing on their critical public safety responsibilities.

The Fire Department will continue investing in critical equipment by replacing aging confined life safety equipment and upgrading Knox Box systems. These investments help firefighters respond safely and effectively while continuing to provide the high level of service our community expects.

Affordable Housing

Affordable housing remains one of the City's highest priorities. Feedback from our community continues to highlight the importance of ensuring residents have access to safe and attainable housing options. Housing stability strengthens neighborhoods, supports local employers and helps individuals and families build long-term connections within our community.

In 2024, the City of Columbia partnered with Boone County to complete a comprehensive housing study that examined current housing trends, demands and disparities throughout the City and County. The recommendations outlined in the study continue to guide the City's efforts to increase the production and availability of attainable housing, including identifying new tools, partnerships and investments that can help address these challenges. The study and its implementation efforts were recently recognized with an Achievement Award from the National Association of Counties for strengthening services and opportunities for residents.

The FY27 budget continues the City's investment in affordable housing through approximately \$610,000 in HOME funding, \$500,000 in Community Development Block Grant funding dedicated to affordable housing activities and continued support for the Affordable Housing Trust Fund established in FY25.

The City is also exploring additional ways to encourage affordable housing development, including the potential use of fee waivers for Community Housing Development Organizations to help reduce development costs and increase housing opportunities throughout the community. Through continued collaboration with nonprofit organizations, housing partners and the development community, the City remains committed to expanding access to attainable housing for residents throughout Columbia.

Resilient Economy

A resilient economy creates opportunities for residents, supports local businesses and provides the financial foundation needed to maintain the services our community values. As Columbia continues to grow, the City remains focused on strengthening our economic future through strategic investment, responsible financial planning and efforts to attract new opportunities.

Columbia Regional Airport is one example of the City's continued investment in economic growth. The airport was recently recognized as the fastest-growing airport in the United States, reflecting the impact of expanded service and continued investment in this important regional asset. In 2025, COU welcomed a record 242,167 passengers, a 17% increase over the previous year. This growth has continued in 2026, with historic passenger increases seen each month. New and expanded service from United Airlines, American Airlines and Allegiant has improved connectivity for residents and businesses, including nonstop service to new destinations and increased capacity to key markets. Continued investment in the airport strengthens Columbia's position as a regional hub, supports economic development and creates new opportunities for the future.

Regional Economic Development Inc. (REDI), the City's Economic Development Department, continues to focus on recruiting new employers, supporting existing businesses and encouraging entrepreneurship throughout the community. The City recently hired an Assistant Director of Economic Development and is currently hiring an additional Business Development Specialist to support these efforts by recruiting and expanding taxable businesses and retailers that provide quality jobs and strengthen the local sales tax base. Supporting entrepreneurs and small businesses also remains an important part of building a diverse and resilient economy.

A resilient economy also requires thoughtful financial planning. The City completed an internal cost of service study to ensure rates remain appropriate and sustainable, as well as a business license fee study with implementation planned for FY27. These efforts will help ensure the City can continue providing high-quality services while maintaining a strong financial foundation.

Throughout the FY27 budget process, City staff also evaluated proposed expenditures to ensure ongoing and one-time expenses aligned with projected revenues. This review resulted in reductions to initial budget requests and allowed the City to balance available resources while continuing to invest in the priorities established by the Mayor and City Council.

Generating additional revenue to keep up with increased costs

For the last several years, I have been discussing the importance of finding additional ways for the City to enhance revenue. The reality for any City is that revenue is collected through taxes or fees, and we have seen a shift in tax revenue recently. City staff have worked hard to reduce costs and to maximize the effect of our resources.

While the City's governmental revenue comes from a variety of sources, the largest portion comes from sales tax. However, the collection rate of local sales tax revenue is being outpaced by the cost of services provided by the City, a trend that is not sustainable.

As our community grows and service costs increase, the City is actively exploring innovative and sustainable ways to generate revenue. By planning now, we can continue to support the programs and services that make our community a great place to live. With thoughtful action, we can avoid reductions and ensure a strong future for years to come.

In FY27, some departments will make adjustments to fees to keep pace with rising operational costs and maintain high-quality services. This presents an opportunity for our community to come together in shaping Columbia's financial future. Through open dialogue and shared understanding, we can find balanced, sustainable solutions that support the services we value and ensure a strong foundation for the years ahead.

Conclusion

Each year, City departments work together to develop a balanced budget that reflects the priorities of our community. This process is never easy, particularly as we face increasing demands, rising costs and limited revenue growth. I am proud of the thoughtful work and dedication of our employees as they continue to find ways to provide high-quality services while making the most of our available resources.

Over the last several years, we have seen the cost of providing essential services grow faster than some of our traditional revenue sources, including sales tax. The City has worked diligently to reduce costs, improve efficiency and maximize the impact of every dollar available. At the same time, we must continue exploring sustainable ways to support the services our residents rely on and ensure the long-term financial health of our organization.

As we plan for the future, maintaining an open dialogue with our community will be essential. Through thoughtful discussion and shared understanding, we can identify balanced solutions that support the programs and services that make Columbia a great place to live while building a strong financial foundation for the years ahead.

I am confident the FY27 budget provides a responsible path forward. Developed with the guidance of our residents and the leadership of the Mayor and City Council, this budget reflects our commitment to investing in our employees, supporting our community priorities

and preparing Columbia for continued growth and success. Together, we will continue working to make Columbia the best place to live, work, learn and play.

Sincerely,

A handwritten signature in blue ink, reading "De'Carlton Seewood". The signature is fluid and cursive, with the first name "De'Carlton" and the last name "Seewood" clearly distinguishable.

De'Carlton Seewood
City of Columbia City Manager

Special Obligation Bond - Downtown Government Center

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$17,580,000	3.50% - 5.00%	9/30/2028	\$3,495,000

In July 2016, the City issued Special Obligation Refunding Bonds. The City intends to fund the annual debt service payments in the bonds through lease payments to be charged to the City enterprise and governmental departments that will occupy space in the government center. The bonds were issued to refund the City's Special Obligation Bonds, Series 2008B.

Debt Service

Sports Field	Original Issue	Interest Rates	Maturity Date	Amount Outstanding
House Phase II	\$2,500,000	4.84%	03/31/34	\$1,983,270

The Sports Fieldhouse Phase II project includes four (4) hardwood courts for basketball, volleyball and pickleball, office space, restroom facilities, multipurpose room, seating area, parking lot, walkways, installation of exterior lighting and the extension of Philips Farm Road. Council approved the Sports Fieldhouse Project Phase II with total funding of \$5,800,000. A loan from the City's Designated Loan Fund provides \$2,500,000 of this funding. Total principal and interest payments, made monthly, are \$315,856 annually for ten years.

Year	Principal Requirements	Interest Requirements	Total Requirements
2027	\$224,809	\$91,047	\$315,856

Albert-Oakland Family	Original Issue	Interest Rates	Maturity Date	Amount Outstanding
Aquatic Center	\$1,200,000	4.35%	09/30/35	\$1,126,131

The Albert-Oakland Family Aquatic Center project may include upgrades to the plumbing/mechanical room, the installation of an ADA/zero entry to the pool, water features, shade structures, as well as updating the diving boards and ADA pool chair lift. Funding for the project is projected to be \$4,000,000 which includes a \$1,200,000 loan from the City's Designated Loan Fund. Total principal and interest payments made monthly are \$148,173 annually for ten years. The following is the proposed schedule for this loan.

Year	Principal Requirements	Interest Requirements	Total Requirements

2020 Airport Special Obligation Bond 2020A

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$14,120,000	1.90%	10/1/2034	\$11,115,000

The City issued \$14,120,000 of Airport Special Obligation Bonds, Series 2020A in May 2020. These bonds are special obligation bonds of the City payable solely from the annual appropriation of funds by the City for that purpose. These bonds were issued for extending and improving the sewage system. Payments of principal are due on October 1 of each year through September 30, 2025, and interest payments are due on April 1 and October 1. The interest rate is 1.900% on this issue.

Fiscal Year	Principal Requirements	Interest Requirements	Total Requirements
2027	\$1,115,000	\$200,593	\$1,315,593

Water & Electric - Debt Service Information

"14 Water and Electric System Rev. Refunding Bonds (05/17/11)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$14,180,000	2.00% - 3.00%	10/01/28	\$3,035,000

In July of 2014, the City issued \$14,180,000 of Water and Electric System Revenue Refunding Bonds. The bonds are planned to be payable solely from, and secured by a pledge of the revenues of the Water and Electric system. The bonds were issued to refund the \$2,010,000 of the outstanding 2003 Water and Electric Series A Refunding Bonds and the \$12,745,000 of the outstanding 2004 Water and Electric Series A Improvement Bonds.

"15 Water and Electric System Refunding & Improvement Rev. Bonds (08/05/2015)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$51,280,000	3.125% - 5.00%	10/01/45	\$27,700,000

In August 2015, the City issued \$51,280,000 of Water and Electric System Refunding & Improvement Revenue Bonds. The bonds are planned to be payable solely from, and secured by a pledge of the revenues by the Water and Electric system. \$18,065,000 of the bonds were issued to refund \$20,620,000 of the outstanding 2005 Water and Electric Series A Refunding & Improvement Bond. \$33,215,000 of the bonds were issued to provide funding for extending and improving the Electric Utility.

"19 Water and Electric System Revenue Bond: Series 2019A (5/21/2019)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$15,150,000	3.00% - 5.00%	10/01/49	\$13,235,000

In May 2019, The City issued \$15,150,000 of Water and Electric System Revenue Bonds. The bonds are planned to be payable solely from, and secured by a pledge of the revenues of the Water and Electric system. The bonds were issued for the purpose of providing funds for acquiring, constructing, extending and improving the Water System.

'19 Water and Electric System Revenue Refunding Bonds: Series 2019B (October 2019)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$70,445,000	3.00% - 5.00%	10/01/42	\$47,660,000

In October of 2019, the City issued \$70,445,000 of Water and Electric System Revenue Refunding Bonds. The bonds are to be paid by the net revenues of the system and certain accounts under the Bond Ordinance to the extent pledged under the Ordinance. The bonds were issued for the current refunding of the 2009A Water and Electric System Revenue Bonds and the refunding of the 2011A Water and Electric System Revenue Refunding and Improvement Bonds.

'20 Water and Electric System Revenue Refunding Bonds (September 2020)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$41,105,000	2.00% - 5.00%	10/01/33	\$25,110,000

In September of 2020, the City issued \$41,105,000 of Water and Electric System Revenue Refunding Bonds. The bonds are to be paid by the net revenues of the system and certain accounts under the Bond Ordinance to the extent pledged under the Ordinance. The bonds were issued for the current refunding of the 2012D and 2012E Water and Electric System Special Obligation Bonds.

'23 Water and Electric System Revenue Bonds (October 2023)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$27,695,000	4.00% - 7.00%	10/01/53	\$26,930,000

In October 2023, the City issued \$27,695,000 of Water and Electric System Revenue Bonds. The bonds are to be paid by the net revenues of the system and certain accounts under the Bond Ordinance to the extent pledged under the Ordinance. The bonds were issued for the purpose of extending and improving the Water Utility.

Sewer - Debt Service Information

'07 Sanitary Sewerage System Revenue Bonds (11/01/07)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$1,800,000	4.00% - 5.00%	01/01/28	\$215,000

In November 2007, the City participated in the State Revolving Loan Program to issue \$1,800,000 in bonds. Voters approved the issuance of these bonds in November 2003.

'10 Sanitary Sewerage System Revenue Bonds (01/14/10)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$59,335,000	1.49%	07/01/32	\$20,264,400

In January 2010, the City participated in the State Revolving Loan Program to issue \$59,335,000 in bonds (State of Missouri - Direct Loan Program - ARRA). The bonds were issued for the purpose of improvements for the wastewater treatment plant. Voters approved the issuance of these bonds in April 2008. * The bond issue of \$59,335,000 is a "not to exceed" amount. Interest expense, included in the debt service requirements listed, is based on principal of \$59,335,000. Actual interest expense will be 1.49% of the actual draw downs made towards the maximum amount of \$59,335,000.

'15 Sanitary Sewerage System Revenue Bonds (03/31/15)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$18,200,000	3.00% - 5.00%	10/01/35	\$10,540,000

In March 2015, the City issued \$18,200,000 of Sewerage System Revenue Bonds. The bonds were issued for the purpose of constructing, improving and extending the City-owned sanitary sewer utility. This issuance is part of a 2008 voter approval of \$77,000,000 (\$7,421,000) and a 2013 voter approval of \$32,340,000 (\$10,779,000).

'17 Sanitary Sewerage Systems Revenue Bonds (04/19/17)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$15,790,000	2.00% - 5.00%	10/01/37	\$10,700,000

In April of 2017, the City issued \$15,790,000 of Sewerage Systems Revenue Bonds. The bonds were issued for the purpose of constructing, improving and extending the City-owned sanitary sewer utility. This issuance is part of a 2013 voter approval of \$32,340,000.

'19 Special Obligation Refunding Bonds, Series 2019 (09/19)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$9,805,000	2.49%	10/01/34	\$9,505,000

In September 2019, the City issued \$9,805,000 of Special Obligation Refunding Bonds to currently refund the outstanding portion, \$9,756,971 of the City's Special Obligation Bonds, Series 2009.

'20 Sanitary Sewerage System Refunding Rev. Bonds (10/2/20)

Original Issue	Interest Rates	Maturity Date	Amount Outstanding
\$6,125,000	2.5% - 3.75%	10/01/36	\$4,540,000

In October 2020, the City issued \$6,125,000 of Sewerage System Revenue Bonds. The bonds were issued for the purpose of refunding the City's Sewerage System Revenue Bonds, Series 2012.

Capital Improvement Program

Photo Credit: Chrissy Daingerfield, Capture CoMo 2026

What is a Capital Improvement Program?

The City of Columbia's Capital Improvement Program (CIP) is a multi-year plan for capital investments in the City's infrastructure, facilities, and equipment. It is designed to address the challenges of supporting future infrastructure needs, while also addressing the City's current facility requirements. It includes items such as roads, bridges, sidewalks, public utilities, drainage projects, recreational facilities, buildings, and equipment. A CIP is important because it connects city development, comprehensive plans, and financial plans. Projects within the CIP are intended to reflect the community's values and goals, and also the overall policy goals of the City Council, including existing city-wide long range plans.

Columbia's City Charter provides policy for the Manager to follow in developing a CIP:

"The City Manager shall also secure an estimate of all capital projects pending and those which it is recommended should be undertaken (a) within the budget year, and (b) within the next five (5) succeeding years. In preparing the budget, the city manager shall review and may revise the estimates, as the manager may deem necessary."

Article 5, Section 35

The City of Columbia's master plans are the basis for the CIP. Columbia has several master plans designed to reflect the long-term needs and goals of each department. These plans are formulated to establish long term development plans that reflect Council policies. These long term plans are periodically revised and updated to reflect the City's changing needs. The CIP is meant to contain projects that fulfill these long-term needs and goals.

How is the CIP Document organized?

The CIP Document is grouped by department and includes a department narrative, a cover page with actuals from prior two years, anticipated current year, and proposed upcoming year, and report pages for all projects planned within the next five years. Each narrative includes information on what projects are upcoming, an update on current projects, and details on how projects in the department are funded.

The cover page includes information on the upcoming fiscal year as well as the prior three years. A graph shows the life-to-date authority compared to the actual expenditures, per department. Capital Improvement Projects are budgeted life-to-date, which means that authority budgeted in one fiscal year may be spent in another fiscal year. Directly below the graph is the data that feeds the graph. The information here shows the life-to-date authority, or appropriation. The table shows the expenditures in three categories: Prior Year Expenditures, Current Year Expenditures, and Encumbrances. The Total Remaining Authority by year is the Life-to-Date Appropriation less those three expenditures. The amount in the Proposed FY 26 column reflects the remaining authority, plus the total amount of appropriations planned for FY 26. The Fiscal Impact section of the summary page details the planned funding sources for FY 26 – where relevant, a pie graph is featured.

The report pages include information such as the name of the project, status, ward, fiscal year construction beings, the total amount appropriated, amount spent to date, funding still needed, and any amounts that are unfunded and/or will require passage of a future ballot in order to be funded and proceed. If a funding source shows a negative amount, it is likely that the negative amount was transferred to another project.

How is the CIP developed?

The CIP begins as a planning document, which gives the City an opportunity to prioritize and coordinate existing and future capital project needs. It is prepared under the direction of the City Manager with the assistance of the Planning and Finance Departments. The City staff review of capital projects has proven to be almost a year-round process, with all city departments continually reexamining and prioritizing their capital needs. However, the capital financing process is most involved from January through May each year. During this period City staff is responsible for compiling project needs, reviewing cost estimates, identifying financing options and planning a program schedule. Meetings are scheduled with each department to review, add, modify and prioritize all project requests. The Planning and Zoning Commission are invited to review the CIP Dashboard in June. The proposed CIP is considered by City Council during the annual budget process. Following approval from the Council, it then becomes a financial document so the City can determine capital projects that are within its current and future fiscal capacity. A summary of the CIP process is provided:

Schedule	Task
January	Projects are discussed within departments
February	Project priorities are discussed between departments and City administration
March	Final project requests are submitted by departments
March/April	Requests are reviewed by the City Manager and updated online on the CIP Dashboard.
June/July	The Planning & Zoning Commission reviews the CIP Dashboard.
July	Public hearing is held on the CIP. A five year CIP, with funding needs, is presented to Council with the budget document and the public is given the opportunity to comment.
August	Budget hearings are held. The public has additional opportunities to comment.
September	Budget hearing incorporating final revisions and adoption of yearly CIP with approved adjustments. Revised CIP document is prepared to reflect any changes made during the budget process.

Deciding which CIP projects to move forward and determining project timing are both very important to serving the needs of the City of Columbia. During the initial stages of the annual CIP process, departments prioritize CIP project requests based on six different categories ranging from Urgent to Deferrable. Using common criteria for determining and prioritizing CIP projects is critical to formulating long-term and short-term plans that reflect the City's values and goals.

Various citizen committees may be formed and appointed by the Council to evaluate projects to be funded through proposed ballot issues. A recent example was the committee formed to assist with passage of the Transportation Sales Tax issue approved by voters in November 2005, which included a list of priority projects to be funded by this tax as part of the CIP.

How are projects in the CIP funded?

The City of Columbia Finance Department evaluates the City's ability to pay for proposed capital projects. This is accomplished by reviewing past revenue and expenditure trends, as well as forecasting future revenues and expenditures for the course of the CIP period. The purpose of this process is to determine the amount of revenue, reserves, and fund balances available from existing sources to pay for capital investments to meet community needs. The following is a list of funding sources for City of Columbia CIP:

Capital Improvement Sales Tax

The City of Columbia uses the Capital Improvement Sales Tax (CIST) to meet capital needs for Public Safety and Transportation. This is a temporary one-quarter cent (0.25%) sales tax which was first approved in 1991 and must be approved by voters to be extended. In August 2024, voters approved the extension of the sales tax which will expire on December 31, 2035.

Parks Sales Tax

Columbia voters approved a one-quarter cent (0.25%) Parks Sales Tax in April, 2000. Half of this tax, or one-eighth cent (0.125%), is a permanent tax to support operational costs as well as limited capital projects. The remaining one-eighth cent is temporary and must be presented to the voters to be extended. This temporary portion has been used for capital projects, including construction of new parks and trails. The current one-eighth temporary tax was extended by voters in November 2021, for ten years, and will expire March 30, 2032.

Development Charges

When a building permit is issued for new construction, the City of Columbia assesses a fee, currently \$0.50 per square foot. Revenue from this fee is used for construction of collector and arterial streets.

County Revenue

This revenue originates with Boone County's one-half cent (0.50%) sales tax for road and bridge maintenance. Boone County has agreed to share a portion of the revenue with local municipalities. The City of Columbia utilizes this funding source to improve, maintain, construct, and repair city streets and roads. This County tax was renewed by voters in 2018 for a 10-year period, and expires in 2028.

Transportation Sales Tax Fund

This fund accounts for the City's one-half cent (0.50%) sales tax used to fund transportation-related projects. Examples include the public mass transportation system, construction and maintenance of streets, roads, bridges, and airports, to the extent of tax revenues.

Designated Loan Fund

This fund includes monies set aside to provide loans to various Enterprise and Special Revenue Funds.

Public Improvement Fund

The Public Improvement Fund was established to account for and disburse the portion of 1% General Revenue sales tax proceeds which have been allocated for the Capital Improvement Plan. The fund receives a portion of the city sales tax and is allocated for a wide range of public improvements to the City which includes general government projects. The amount of the one cent General Fund Sales Tax allocated to capital improvements from FY 01 to FY 19 was 4.1%. In FY 20, City Council approved an amendment to reallocate 2.1% of the General Sales tax back to the General Fund. In FY 26, there will be no additional allocation to the Public Improvement Fund.

Bond Funds

Utility funds (Water, Electric, and Sewer) may obtain voter approval for bond issues to help finance their capital project needs.

Enterprise Revenue

Enterprise Funds (Railroad, Water, Electric, Airport, Solid Waste, Sewer, Storm Water, Transit, and Parking) generate their own revenue which may be used to finance their capital project needs.

Budgeting for CIP

In a municipal budget, CIP revenues and budgeted expenditures almost never match in a given year because of the way those projects are funded, timed, and accounted for. The budget reflects appropriation authority (what can be spent) rather than a cash-in/cash-out match for that single year. Here are several considerations when budgeting for capital projects:

1. Projects Span Multiple Fiscal Years

- Capital projects often take years to plan, design, bid, and build.
- The **full project cost** may be appropriated in one year, but the **actual spending** happens over several years.
- In early years, you might see high budgeted expenditures but only partial revenue received (or vice versa).

2. Different Timing of Revenue vs. Spending

- Revenue sources (like grants, bonds, or dedicated sales taxes) may be received **upfront**, **mid-project**, or even **after completion** through reimbursements.
- For example, a federal transportation grant may only reimburse expenses after the City spends the money. This means expenditures happen before the matching revenue shows up.

3. Use of Fund Balances and Reserves

- Some projects use **fund balances** from prior years (unspent revenues that have been saved for the project).
- Those funds show up as expenditures in the current year but **not** as current-year revenue because the money was collected in a prior budget.

4. Bond Financing and Debt Proceeds

- When a project is funded by bonds, the **proceeds** from the bond sale are recorded as revenue in the year issued, but the **debt payments** occur over decades.
- This makes revenue appear much higher in the bond year, but much lower in subsequent years while spending still happens.

5. Grants and Intergovernmental Agreements

- Many capital projects rely on grants that require timing-specific matches or reimbursement.
- A mismatch occurs if the grant award year doesn't align with the actual construction year.

General Government Capital Projects
