RE: 2018 Renewable Energy Report

At the Water and Light Advisory Board's regularly scheduled meeting on April 4th, 2018, board members reviewed and discussed the final 2018 Renewable Energy Report. The Water and Light Advisory Board is in support of the Department's renewable energy efforts to meet the goals as detailed in the 2018 Renewable Energy Report. The Board's concerns centered on the cost accounting for the net-metered photovoltaic resources.

As a result of the discussion, a motion was made, seconded and passed unanimously that the Water & Light Advisory Board intends to conduct a more in depth review of the renewable impact cost accounting system before the issuance of the next Annual Renewable Energy Report.

Sincerely,

John T. Conway, P.E.

Chairman, Water and Light Advisory Board
