Hey Kirtis,

This has to do with the proposed annexation for new city of Columbia administrative offices and future fire house, specifically at the intersection E Hwy WW and S El Chaparral Ave.

This intersection needs, at this point and has for some time, a stoplight intersection, not a roundabout. This would alleviate the backup of numerous cars trying to squeeze out onto WW between traffic from the east into oncoming traffic on WW headed west. It would also prepare for this area for the expanded development that is already in place further east on WW.

We realize that WW is a state maintained highway, however I'm sure the city has major input on this issue.

It would also allow the fire department to trigger the signal and dispatch their trucks with greater safety for all drivers.

Thank you for your consideration,

Thomas C. McNabb
