- I support Option 2 for traffic calming on N. William St./Hinkson Ave.
- I support both options for traffic calming on N. William St./Hinkson Ave.
- I do NOT support traffic calming being install on N. William St./Hinkson Ave.

We are accepting comments until March 12, 2021. Thank you for your input!

Comments:

Option 1 makes the most sense. It provides safety through the use of bulbouts, chicanes, and medians and will improve safety for pedestrians and bikes in the area. I hope the city moves forward on this option. Thank you.

Comments:

I support Option 1 for the North William Street/Hinkson Avenue traffic calming project. Using bulbouts, chicanes, and medians will improve safety for everyone using the street, and will change the visual perspective of those corridors to calm streets, where people driving can expect to encounter non-motorized transport. In addition, speed humps are a nuisance to drivers and cyclists, while generally not slowing traffic as effectively as chicanes, and causing issues for emergency vehicles. As a Vision Zero city, it's important that we design streets to be safe for all travel modalities. Thanks!

There is more space on the back of this form.

Comments:

If traffic calming must be done I am not in favor of barriers that squeeze traffic. It is too difficult to get around a parked car and larger, wider vehicles can find it dangerous or destructive. Even the new sidewalk egresses are difficult and dangerous for bikes trying to cross some intersections particularly if they are trying to turn. Cyclists who ride on the sidewalks and have to use them are generally not confident maneuvering through them and are therefore dangerous to themselves, oncoming traffic and pedestrians.

~~Speed bumps would be much more appropriate on these roads~~

Comments:

PedNet Coalition supports the N. William St./Hinkson Ave. traffic calming project, and particularly Option 1 for N. William St.

We support using bulbouts, chicanes, and medians to improve safety for everyone using the street. These features change the visual perspective of the corridor, and communicate that this is a calm, residential street where people driving can expect to encounter people walking and biking. We also support the installation of crosswalks to improve safety and visibility of people walking.

There is more space on the back of this form.

Comments:

I think the amount of foot traffic / ^{Benton} school traffic make # 2 best.

The Paris Rd to Old 63 on Hinkson is like a sling shot corridor and # 2 has more traffic calming proposals than #1 or #3

Comments:

While I will accept Any thing that slows down traffic on William street, I STRONGLY prefer Option 2. From what I've read, downhill chicanes are treated like downhill slalom courses by some drivers and that is exactly the situation between Richardson + Walnut going south. If speed

Tables and/or humps are acceptable for other downtown streets near the hospital (e.g. Walnut between College & Melbourne.) I can't think of any good reason not to try the most impactful method near a Montessori school! The intersection of Windsor & William must be fixed before someone is hit. The number of close calls that I am aware of is in the double digits. And it's not just kids, if I wasn't alert and fast I would have been hit on several occasions.

Please correct this situation as quickly as possible!

Comments:

I cross William at Windsor about twice/day at the clearly marked pedestrian crosswalk. I'm 6'3". Drivers can see me approaching the crosswalk from a LONG way off and have plenty of time to slow a bit to let me cross.

There is more space on the back of this form.

Public Comment Form

At the distance I'm visible it might cost them a couple of seconds if they just slowed to the speed limit to give me a chance to cross. I'd say about 30%, however, hit the gas and dare me to cross, gliding as they go by. Who do I think I am to expect them to slow down for someone walking? Far too many people have zero respect for other people's safety. Maybe their respect for their cars' suspensions would get them to slow down. We need a Big speed table at that and similar intersections. If Stephens girls get one what about the pre-schoolers at the Montessor school and the kids at Benton-Stephens? Yes, I know emergency vehicles use William, but we're talking about mere seconds. It's worth it to avoid ever needing them for a crushed child on William or Hinkson. Putting speed tables on those streets should be a no-brainer. Why it's taking so much wangling to get them in a town where pedestrian-friendliness is a goal is just plain inexplicable. And infuriating. Just do it for God's sake!

Comments:

I lived in the Benton Stephens neighborhood for 30 years. I do not live there now but feel the traffic calming project is extremely important to create a sense of community there.

As an avid bicyclist I feel OPTION 1 is best.

Hi Taylor,

The fillable form on the website doesn't save my text when I save the PDF, so screenshots of the text are below and comments are pasted here:

Comments:

I strongly support Option 2, as I think the elevated intersection will slow traffic from both directions on William Street. The speed of N-S traffic on William is incredible; some drivers have to be going ~50 MPH. An elevated intersection would also force eastbound and westbound drivers on Windsor to pay closer attention that this intersection is not a 4-way stop. Near-accidents are relatively common at this intersection by Windsor drivers entering William thinking that N-S traffic stops. THANK YOU for your attention to this traffic safety hazard to our young son who plays nearby and for your efforts to slow traffic in this neighborhood. Very appreciated and anxious to get this going. I also support Option 1, but I more strongly prefer Option 2.

We are accepting comments until March 12, 2021. Thank you for your input!

Comments:

I support Option 1 because it is easier for all pedestrians crossing a sometimes busy street AND I believe it helps reduce traffic speed. It is esthetically pleasing and "fits" the way we like to present our town to current and future residents. A forward thinking city that is pedestrian and bike friendly.

There is more space on the back of this form.

Subject: [PubW]: William Street Traffic Calming
To: <pubw@como.gov>

Good Evening,

I have lived in an apartment at 1606 Amelia since 2012. I can tell you than the main issue I personally face is vehicles parked or stopped on the side of William between Hinkson and Amelia. I have to drive in the wrong lane to get around them. In no way do I think further limiting the drivable area would help with this. Speed bumps are the much better option of the 2 plans. Please do not put in any bulbout islands or medians. There would be no way for me to get around these illegally parked or stalled vehicles if you did this. Thank you in advance.

Sincerely,

Katherine Richardson

Taylor Shelton <taylor.shelton@como.gov>

(please include "N. William St./Hinkson Ave. Traffic Calming" in the subject line and provide your name and complete mailing address)

- I support Option 1 for traffic calming on N. William St./Hinkson Ave.
- I support Option 2 for traffic calming on N. William St./Hinkson Ave.
- I support both options for traffic calming on N. William St./Hinkson Ave.
- I do NOT support traffic calming being install on N. William St./Hinkson Ave.

We are accepting comments until March 12, 2021. Thank you for your input!

Comments:

I support Option 1 for the North William St. / Hinkson Ave. traffic calming project. Using bulbouts, chicanes, and medians will improve safety for everyone using the street, and will change the visual perspective of those corridors to calm streets, where people driving can expect to encounter people walking and biking. Thank you!"

We are accepting comments until March 12, 2021. Thank you for your input!

Comments:

My preference is to have both options because I believe several types of speed management options will be more effective than individual types. If given the choice of one option, speed humps would be my preference; they cost a little less than concrete, probably more durable over time, and are more easily and effectively repaired. If given the option of a speed table at Hinkson and N. William, I would jump up and down with excitement; that intersection is notorious for stop-sign indifference.

Comments:

I suspect either option would have some benefit and a few drawbacks, so I really think either would end up being all right in the end. Here are my possible areas of concern, that I hope you'll keep in mind:

- For the chicanes option, it seems like cyclists and wheelchair users (who often detour to the street for snow and ice or poor sidewalk/driveway conditions) would have a slightly harder time using the street where the chicanes are adjoining/adjacent to the curbs. The other concern is just whether they would really work as well to control speed. It seems like not a whole lot of evidence was presented by staff on that.

There is more space on the back of this form.

Subject: [PubW]: N. William St./Hinkson Ave. Traffic Calming
To: <pubw@como.gov>

Hello,

Thanks for working with the neighborhood to make it safer for everyone.

I support both options, with some comments on both.

1. With chicanes, I'm worried about creating pinch points for cyclists and folks in wheelchairs, and the general effectiveness compared to humps (being that these would be the first in town). And, also, how much would chicanes might affect snow-removal.

2. The potential noise increase caused by speed humps is my main concern. And our house already shakes when heavy trucks drive by. But maybe the issue will be moot with the slower speeds of travel.

Thanks again!

We are accepting comments until March 12, 2021. Thank you for your input!

Comments:

I am most supportive of Option 2. As a 15 year resident of B.S. neighborhood at the interseciton of William/Windsor, and a property owner on Richardson and Brighton Street, I believe Option 2 will be most effective at calming traffic in the neighborhood and greatly improve the safety of pedesitrians crossing William Street at the William/Windsor intersection.

If Option 2 is not possible, then I am supportive of Option 1.

Public Comment Form

MY APPROVAL OF OPTION #2 IS ONLY BY DEFAULT, AS IT CAUSES THE MINIMUM AMOUNT OF DISRUPTION TO THE OWNERS & ~~THE~~ TENANTS ON THIS ROAD.

WOULD IT NOT BE MORE EFFECTIVE AND FINANCIALLY PRUDENT TO INSTALL 4-8 STOP SIGNS, PIECES OF METAL SET IN THE GROUND WITH CONCRETE, RATHER THAN SPEND THE MONEY POURING A LARGER AMOUNT OF CONCRETE? AT LEAST OPTION #2 SEEMS TO BE LESS CONCRETE TO MAINTAIN & INEVITABLY WATCH FALL INTO DISREPAIR.

WHAT LOGICAL SENSE DOES IT MAKE TO BE SO AVERSE TO A TRADITIONAL & EFFECTIVE MEANS OF SLOWING TRAFFIC? IT HAS BEEN STATED THAT THIS STREET DOESN'T HAVE ENOUGH TRAFFIC TO JUSTIFY PLACEMENT OF STOP SIGNS. THEN WHY ARGUE PROPOSING & DISCUSSING TRAFFIC CALMING MEASURES IN THE FIRST PLACE?

STOP SIGNS WOULD BE FAR LESS OF AN IMPEDIMENT TO EMERGENCY VEHICLES THAN EITHER OPTION. I SUPPOSE WE HAVE TO WAIT FOR A PEDESTRIAN OR BIKER TO BE KILLED BY A RECKLESS AND/OR IMPAIRED DRIVER BEFORE OUR COMMUNITY CAN EXPECT TO SEE SENSIBLE RESULTS FROM OUR INCREASINGLY INCOMPETENT LOCAL GOVERNMENT.

Thank you for addressing a longstanding traffic problem in Benton Stephens.

1. I support speed bumps as designed on North William St.
2. I support speed bumps on Hinkson, however, I don't think one speed bump can address the speeding on Hinkson between Paris Road and N. Williams St.
3. I prefer an additional speed table at the Hinkson/Ripley intersection. Speeders ignore the 20 MPH School sign.
4. I do not support chicanes on N. Williams St. because I suspect that these will encourage speeders to be reckless, rather than to slow down.

Sincerely,
Kristen Heitkamp

Taylor,

Please see email regarding N William / Hinkson. I emailed Mr. Gardiner back to ask if his form should have comments. He said his comment is what is showing in the email itself.

Thanks,

Dana Sample, CTA

if going forward

- I support Option 1 for traffic calming on N. William St./Hinkson Ave.
- I support Option 2 for traffic calming on N. William St./Hinkson Ave.
- I support both options for traffic calming on N. William St./Hinkson Ave.
- I do NOT support traffic calming being install on N. William St./Hinkson Ave.

We are accepting comments until March 12, 2021. Thank you for your input!

I do not think it is necessary because those who speed are going to regardless. The only difference is if chicanes are installed they will drive on wrong side of road. Absolutely do not support chicanes. As they difficult to make R hand turn onto Williams from side street. Also, I do not like the idea of driving on wrong side of road.

To: <pubw@como.gov>

Taylor,

I cannot tell you how VERY MUCH we want and need this calming.

It is long overdue and Benton Stephens would appreciate your speed (ha) resolution to the excessive speeding in the neighborhood.

Yesterday would NOT be soon enough.

Comments:

Speed humps are a more cost effective solution, tried and true. I would ideally like to see a speed table at the intersection of William and Hinkson because it would help to correct the problem of people failing to stop at the sign at that intersection. I would support chicanes, however I think the concrete curbs will degrade in time and will not be repaired. Broken curbs look like broken sidewalks, and if there is no budget to repair sidewalks, I don't think there will be any money to fix broken curbs.

Comments:

I own 1509 Brighton Street. I would like to see cycle slips incorporated into the speed humps. I would also like to express concern for the Chicane located near Brighton Street if Option 1 is chosen.

Comments:

Though I strongly support controls to reduce vehicle speed on both streets I cannot give enthusiastic support to any option without speed enforcement. However, I favor speed humps and tables even though cars accelerate aggressively after crossing over them. My primary concern with chicanes is that they will not be maintained, leaving broken curbs and concrete. In addition to these projects the N William/Hinkso four way stop needs to be put on a twice-yearly, spring and fall repaint schedule. Thank you.

Comments:

I support Option 1 for the North William St. / Hinkson Ave. traffic calming project. Using bulbouts, chicanes, and medians will improve safety for everyone using the street, and will change the visual perspective of those corridors to calm streets, where people driving can expect to encounter people walking and biking. Thank you!
