Hi David,

Just following up on our discussion yesterday of the proposed Elm Street closure. I agree that we, at the City would have had to do such a closure at some point in the not-too-distance future in order to replace the stormwater conveyance box that runs through the middle of the site which is in very poor condition. As that conveyance neared failure, we would have had to replace it and would likely have had to do so on an alignment that would have required closures.

Tom
