Project Description:

The purpose of Fetal and Infant Mortality Review (FIMR) is to conduct comprehensive multidisciplinary review of fetal and infant deaths to understand how a wide array of local social, economic, public health, educational, environmental, and safety issues relate to the tragedy of fetal and infant loss. Analysis of FIMR findings will identify and examine disparities in fetal and infant deaths and provide a framework for determining root causes of persistent disparities in access to and the delivery of care and in infant mortality rates. FIMR teams shall use the findings to take action that can prevent future fetal and infant deaths and improve the systems of care and resources for women, infants, and families.
