

9/15/2025

To Whom It May Concern:

City of Columbia Utilities will undertake the project described in the accompanying information provided to the U.S. Department of Energy. The total cost of the project is \$4.5 million, of which \$3 million will consist of federal funds. The cost match amount of up to \$1,473,900 (i.e., at least 49.13%) of the grant award amount of up to \$3 million will come from the purchase of transmission poles. The cost match type will be as follows:

	Cost Match Type	Description
<input type="checkbox"/>	Cash	
<input checked="" type="checkbox"/>	In-Kind	Transmission poles

Our organization acknowledges that cost match contributions must be verifiable from its records and necessary and reasonable for proper and efficient accomplishment of the funded project. Since all sources of cost match are considered part of total project cost, our organization also acknowledges that the cost match dollars will be scrutinized under the same federal regulations as the subaward funds.

Sincerely,

Erin Keys
 Utilities Director
