Runway 2-20 was constructed in the 1960's. The PCI values according to the preliminary PMS conducted in December 2016 range from 10-89 with a weighted average of 67. The proposed project is intended to capture the areas that require removal and replacement. There are four major areas as shown including taxiways. The proposed pavement section will be developed using a composite of the fleet mixes compiled for the runway intersection project and the Runway 13-31 project. The repairs will not encroach into the Runway 13-31 RSA.
