Council Meeting Date: February 5, 2018

Re: Ordinance authorizing Construction- Bryant Street & Switzler Street Water Main Replacement

Executive Summary

Staff has prepared for Council consideration an ordinance authorizing construction for the replacement of aging water distribution infrastructure along Bryant Street from Ash Street to Switzler Street and Switzler Street from Garth Avenue to Lasalle Place. Funding of \$420,000 has been appropriated for this project under project number W0281 of the Capital Improvement Program. An interested parties meeting was held for this project on November 16, 2017.

Discussion

Staff has identified the need to upgrade water distribution infrastructure along Bryant Street from Ash Street to Switzler Street and Switzler Street from Garth Avenue to Lasalle Place. See the Bryant St & Switzler St Main Upgrades drawing included with this memo.

The existing water mains within the project corridor consist of 4-inch and 6-inch cast iron that was installed in the early 1960's. These aging water mains are nearing the end of their useful service life and are requiring increased levels of maintenance. The new water mains will be constructed of 6-inch PVC piping, meeting current standards. The new water mains will provide greater reliability for customer's water supply as well as increase available flow to the area for fire protection purposes. This water main replacement is planned to take place within the existing right of ways. Existing fire hydrants will be replaced along with an additional new fire hydrant being installed to meet current fire code. Customer's water services will be transferred to the new water main at no cost to them.

As part of the public improvement process, staff sent letters to all customers and land owners in the affected areas and held an interested parties meeting on November 16, 2017. At this time, all feedback received from stake holders have been in support of this water main replacement.

Upon City Council approval of this ordinance, plans and specifications for the water main replacement project will be finalized and issued for construction utilizing department staff and/or existing term and supply contracts.

Fiscal Impact

Short-Term Impact: Funding of \$420,000 has been appropriated for this project under Capital Improvement Project W0281.

Long-Term Impact: None

Strategic & Comprehensive Plan Impact

Strategic Plan Impacts:

Primary Impact: Infrastructure, Secondary Impact: Not Applicable, Tertiary Impact: Not Applicable

Comprehensive Plan Impacts:

Primary Impact: Infrastructure, Secondary Impact: Not applicable, Tertiary Impact: Not Applicable
