N. William St./Hinkson Ave. Traffic Calming

We would appreciate hearing your thoughts about this project. You may make comments on this form and leave it with City staff at today's meeting; or take it home to fill out. Please write legibly, include your complete mailing address, and sign your comment form.

Comment forms can be mailed to: **Taylor Shelton
Public Works Department
City of Columbia
PO Box 6015
Columbia, MO 65205**

Comments may also be faxed to.... **(573) 449-9641**
or forwarded via E-mail to... **pubw@CoMo.gov**
(please include "N. William St./Hinkson Ave. Traffic Calming" in the subject line and provide your name and complete mailing address)

- I support traffic calming being installed on N. William St. /Hinkson Ave.
 Traffic Calming wouldn't bother me if it were implemented
 I do NOT support traffic calming being install on N. William St. /Hinkson Ave.

We are accepting comments until November 8, 2019. Thank you for your input!

Comments: In addition to "Speed Bumps" And additional "Stop" Signs - RADAR on a Schedule that would slow speeding of cars & motorcycles would be beneficial. Also, North Ann Street from Hinkson Street could also use "Speed Bumps". Cars from Paris Road going South on North Ann St. also speed despite a lot of pedestrian traffic on the (ave)

There is more space on the back of this form.

Comments:

The crossing at William and Windsor is a major concern for me and I hope you'll improve the maintenance there as soon as possible. That intersection and Hinkson from William to Old 63 are the biggest concerns of mine. I would support humps or tables or even bulbouts on William where there is no parking. I'd still love to hear consideration of

N. William St./Hinkson Ave. Traffic Calming: comment form

1 message

Ann Marie Gortmaker <amgortmaker@gmail.com>

Wed, Nov 6, 2019 at 9:59 PM

To: Taylor Shelton <Taylor.Shelton@como.gov>

I support traffic calming being installed on N. William St. /Hinkson Ave.

My preferences include curb bumpouts with high contrast crosswalks at William and Windsor; strategically spaced speed humps/ramps along William as well as Hinkson east of William; high contrast crosswalks; radar speed monitoring along William and Hinkson once every 90 days..

Thank you very much for the opportunities for public input on this topic.
Ann Marie Gortmaker

Taylor,

Thank you for taking public comment on proposed traffic calming measures on William Street at Hinkson.

I support a combination of speed humps and speed tables. I believe a speed table at the intersections of William/Windsor and William/Hinkson make a lot of sense. Speed humps along William, especially between Richard and Walnut would be valuable. I support my neighbor's along Hinkson call for speed humps as well. I know traffic flies down that road too.

Thanks again for the high visibility intersection. It has improved the yield rates. Also, thank you very much for the speed trailer. The trailer has greatly reduced the speed back down to 25mph for the most part. It's very much a noticed improvement. Thanks again for requesting it.

Have a good week,

Kip Kendrick

Taylor- the copy I received was a pdf, so thought I would just email you. I do support the traffic calming efforts at William and Hinkson. Hinkson is used as a de facto high speed link between Paris and old 63 and William is well, too fast. The white on black crosswalks are good. A bit lacking in surface preparation, however.

All in all, it is good to see Benton Stephens getting some attention. There are kids here whose activities spill into the street, and anything to slow the traffic is welcome.

-Gregory

Susan Eggener <stotheegener@centurytel.net>

Wed, Nov 6, 2019 at 6:42 AM

To: taylor.shelton@como.gov

Traffic tends to travel over the speed limit on William Street, as well as on the intersecting Windsor Street, which is also the city's Bike Boulevard.

The intersection of William and Windsor is only a two-way stop, with a crosswalk across William, the nonstop-signed street.

There are three schools in the immediate area (Windsor St Montessori, Stephens Lab School, and Benton Elementary) with a significant amount of children foot traffic going on field trips to Lions Stephens Park and Stephens Lake Park, also in the immediate area. Windsor has an increasing number of cyclists crossing William as well.

In my observation, the recently installed speed hump on Walnut St., one block over, on Stephens College campus (also in the immediate area!) has done wonders for slowing traffic on that busy thoroughfare.

Might a speed bump be possible at the William/Windsor intersection?

Thank you for your time.

Comments: This neighborhood has lots of people who walk their dogs, enjoy gardening in their yards, and kids who play catch in the street.

I see a lot of dangerous, distracted driving, so please do something to slow people down.
Thanks!

Comments:

The data demonstrate a significant and alarming upper rate of travel by users of both North William St., between Paris Road and East Walnut St., and Hinkson Avenue, between Paris Road and Old Highway 63. Hinkson Avenue, in particular, has been used numerous times in recent years for high-speed chases involving CPD and those running from CPD; I have personally witnessed cars going airborne at the intersection of Hinkson Ave. and North William St. In addition, the high rate of travel on Hinkson coupled with one-sided parking, has resulted in numerous accidents in which parked cars were damaged or totaled over multiple instances. We have had three telephone poles knocked over by reckless drivers, one car flipped onto a cement berm that is approximately 20 inches tall, and a car that drove into a tree that subsequently fell onto and punctured the roof of another car. I cannot count the number of times that accidents have occurred at the intersection of Hinkson and North William, and obedience to the 4-way stop at Hinkson and North William is optional. I am honestly very surprised no serious injury has occurred here yet.

I support speed humps, speed tables, bulb outs, chicanes. Anything, really, except for stop signs. Stop signs do not work. I challenge anyone who says they do work to come and record the number of vehicles that fail to stop at Hinkson and North William; I would not be surprised if they found between 10 and 30 vehicles per day.

Second-ranked preference is a speed hump or raised intersection.

Please no flashing crosswalk lights - the lights are very bright & would flash into our window + those of 2 other homes @ intersection.

William + Windsor is very dangerous for pedestrians. Traffic does NOT stop.

Please make some change/measure to slow traffic as soon as possible. I worry for our 3 year-olds safety living on William.
