**LPHA Contractor:** Columbia/Boone County Department of Public Health & Human Services

**Selected Priority Health Issue:** Prevent and reduce obesity among children, adolescents and women.

**Statement of the Problem: Goal(s):** The Columbia/Boone County Department of Public Health & Human Services has been involved a 1 ½ year-long community-wide planning process for improving public health in Boone County as well as monitoring our community's health status. To guide the process PHHS chose to use the Mobilizing for Action through Planning and Partnerships (MAPP) framework because of its strong emphasis on community input. MAPP is a nationally-recognized process developed by NACCHO (the National Association of County and City Health Officials) and CDC (Centers for Disease Control and Prevention) to aid public health agencies in the development of health assessments. Please see the following link for more information on the MAPP process.  
<http://www.naccho.org/topics/infrastructure/MAPP/index.cfm>

Through the MAPP process a Community Themes and Strengths Assessment (CTSA) was conducted and consisted of the Community Health Survey, along with focus groups. The Community Health Survey asked "Which five health conditions or behaviors have the greatest impact on our overall community health?" Results from 1,653 respondents showed 43.6% listed obesity, 42.4% drug abuse, 42% mental health, 36.1% alcohol abuse, and 29.6 poor eating habits/choices. These results indicate that Boone County citizens realize the impact obesity and poor eating habits/choices have on our community. For more results see the attached CTSA document.

In the 2014 County Health Rankings (County Health Rankings and Roadmaps, 2014) report 11% of Boone County residents feel they are in poor or fair health, having an average of 2.7 poor physical health days in the last month. Health factors reported from Community Commons for Boone County were: adult smoking - 18%; adult obesity – 26%; physical inactivity - 23%; inadequate fruit & vegetable consumption - 77.6%. Eating five or more servings of fruits and vegetables a day and being physically active have been identified as preventative behaviors for many chronic diseases and premature death. The Missouri DHSS 2011 County Level Study reports 86% of Boone County residents eat fewer than the five fruits and vegetables a day. Only a little over 1 in every 10 are consuming the recommended amount. The report also identifies that in Boone County 4.35% of total household expenditures were for fruit and vegetable consumption while 5.22% were for soda consumption.

In addition there is a well-documented link between physical inactivity, obesity and chronic illness. Boone County reports a lower percent of population with no leisure time physical activity (23.3%) than Missouri (26.6%). At the same time 48% of the population lives within ½ mile of a park, this is also higher than the Missouri rate of 33% (Community Commons). The 2011 County level study reported 58.1% of Boone County residents used walking trails and parks; 59.1% have sidewalks in their neighborhoods, 81.9% considered their neighborhood to be safe. Even with these statistics the perceptions of safe places to be active varies by neighborhood.

Obesity now affects 17% of all children and adolescents in the United States, triple the rate from just one generation ago (CDC-Overweight and Obesity). While child obesity rates are difficult to measure at a county level, it remains a community problem. For FY 2013 data shows that 33% of Head Start Children in Boone County are overweight or obese and that 13.3% WIC children age 2-5 years are overweight and 19.2% at risk for overweight. Also in FY 2013 Boone County WIC had 56.3% of women starting their pregnancy overweight.

**Goals:**

- Improve physical activity environment and physical activity in the community
- Improve messaging environment
- Improve food and beverage environment
- Improve health care sites and childcare environments

**Strategies:**

- Discourage consumption of sugar-sweetened beverages
- Community-wide campaigns
- Individually adapted healthy behavior change programs or social support intervention in community settings
- Support and promote community and home gardens
- Participate in community coalitions or partnerships to address obesity
