IV. OLD BUSINESS

a. None

V. NEW BUSINESS

a. Emergency Preparedness and Public Health - Rebecca Estes

Chris Kelley and Rebecca Estes introduced themselves to the Board of Health. Kelley told the board that he had worked with the City of Columbia for 23 years in public safety. He currently works as the Director of the Boone County Office of Emergency Management. He briefly explained his staff at the Office of Emergency Management and what federal agencies help fund his operation. The Office of Emergency Management coordinates with municipalities and other entities to ensure the safety of persons and property during an emergency event. Kelley named a few events that the office of emergency management attends and prepares for, such as Mizzou football games or large-scale protests. Kelley recommended the Board of Health take a tour of the Office of Emergency Management. The Board was receptive to his recommendation.

Planner Rebecca Estes explained her job to the Board of Health. Every county in Missouri must have at least one person who is the Emergency Preparedness Director. Boone County has multiple people in the city and county that plan for emergencies, Estes included. The Emergency Preparedness Director convenes all emergency preparedness partners to plan for any emergencies.

Estes states that Boone County experiences a lot of flooding due to the Missouri river swelling. Some areas flood fairly regularly and the county prepares people in the area for that. Kelley stated that urban flooding has increased in Boone County and all over the country due to global warming. Tornadoes have also become a concern in the area in recent years, especially after a tornado struck Jefferson City a few years ago. After any flood or emergency, partners must provide preliminary estimates for the cost of damages to both the state of Missouri and to the federal government. Estes stated that ice storms are the busiest time for emergency preparedness due to power going out, food going bad, and accidents caused by ice. Emergency preparedness also monitors chemical spills in the area caused by runoff from industrial sites.

Kelley said that Boone County has 103 outdoor emergency sirens in Boone County. They plan on adding ten more sirens in areas they deem to have a sufficiently large population.

Columbia and Boone County receive funding from the Public Health Emergency Preparedness Grant (PHEP) which began in 1999 as a competitive bioterrorism grant due to a spike in anthrax attacks. It was reprogrammed after 9/11 to offer public health emergency preparedness funding for all state and local communities. PHEP is mostly a pass-through grant from the CDC to the State of Missouri to PHHS. Certain

requirements have to be met by Missouri to receive the funds. For a municipality or state to receive PHEP funding, 15 capabilities must be reached. Estes said that multiple city agencies and departments are coordinated to make sure that each department can do its roles in emergency management. The role fulfilled by the health department is to provide surveillance on potential hazardous materials that might be biological, chemical, or radiological. This would include helping to coordinate food and water safety. PHHS also provides mass prophylaxis to first responders and the public. PHHS works with other departments and agencies to coordinate messaging so that the public would receive information all at once. An incident command chart was shown to the board to help them visualize how the command structure would work in case of an emergency. An operations chart was also shown to the Board where it explained the role of each division in responding to an emergency. She explained some roles done by the health department during the COVID-19 pandemic. This includes tracking volunteer hours and providing vaccinations.

b. Discussion of future Board of Health agenda items

Ella Miller, DDS was introduced and the board introduced themselves.

c. Discussion of future Board of Health agenda items

Director Browning suggested several topics for discussion at future board meetings. Browning has been in contact with Mark Johnson at the University of Missouri who heads the SewerShed Surveillance Project. Johnson has expressed interest in meeting with the Board of Health. Browning also expressed interest in touring the emergency preparedness facility. Szewczyk said he would be interested in refugees and immigrants arriving in Boone County and how they interact with local public health services including what resources are available. Members of the board said they would be interested in going to the water treatment facility. Browning said the state of Missouri is working on a foundational public health system model that would be required for all Missouri health departments. The goal is to make sure that every person is getting what they deserve from their health department. It would also provide more resources for smaller health departments.

VI. REPORTS

a. Director's Report - Stephanie Browning

Browning said PHHS is currently working on budgeting and planning for the next six to eight months. The commission on the opioid settlement funds plans to meet with several board members to discuss best practices for spending the opioid settlement funds. PHHS held an opioid town hall meeting to discuss overdoses in Boone County. Naloxone was also distributed at the town hall meeting. Browning said that legislation is being worked through the general assembly that would void any laws or codes at the local or municipal level regarding tobacco or tobacco products. This would include local laws requiring that a person be 21 years old to purchase tobacco products. Szewczyk noted that throughout the country local Tobacco 21 legislation has been effective at limiting access by minors to tobacco products.

VII. GENERAL COMMENTS BY PUBLIC, MEMBERS AND STAFF

a. None

VIII. NEXT MEETING DATE

a. May 9, 2024

IX. ADJOURNMENT

a. Geiser moved to adjourn the meeting, seconded by McKinney. The motion passed unanimously. The meeting adjourned at 7:02 PM.

Members of the public may attend any open meeting. For requests for accommodations related to disability, please call 573-874-CITY (573-874-2489) or email CITY@CoMo.gov. In order to assist staff in making the appropriate arrangements for your accommodation, please make your request as far in advance of the posted meeting date as possible.

USB DRIVES PROHIBITED: Due to cybersecurity concerns, flash drives and other media devices are no longer permitted for delivering files or presentation materials. A speaker who desires to display a presentation must upload the presentation, in advance, to the city network using an upload portal. To upload your files and learn more, visit CoMo.gov/upload.
