

NOTE:
 STREET LIGHT SPACING VARIES BETWEEN 170 FT TO 200 FT APART TO AVOID ANY UNDERGROUND UTILITIES BASED ON LIGHTING PLANS FROM PROVIDENCE ROAD PLAN (VANDIVER DRIVE TO BLUE RIDGE ROAD) AND SCOTT BOULEVARD PHASE 1 (ROLLINS ROAD TO BROOKVIEW DRIVE). RECOMMEND THE STREET LIGHTS BE LOCATED ON THE WEST SIDE BETWEEN THE BACK OF CURB AND THE SIDEWALK. THE EAST STREET PAVEMENT OF PROVIDENCE ROAD WILL BE CONSTRUCTED AT A LATER DATED. THERE IS A 12" PVC WATER LINE ON THE EAST SIDE THAT LIGHT POLES MIGHT CONFLICT WITH.
