Re: Long-Term Closure  
General Site – Repair Rollins Street Steam Manholes  
MU Project # CP161411

Dear Mr. Hagenhoff,

On behalf of the University of Missouri, I would like to formally request that the City of Columbia allow the urgent repair of three Steam Manholes in Rollins Street west of Virginia Avenue. Attached is a road closure map submitted for your consideration.

The Campus will coordinate the closing of Rollins Street to no-through traffic between Hitt Street and Virginia Avenue with City of Columbia staff. The closure of Rollins road for this work will begin on Tuesday May 15, 2017 and extend until August 11, 2017. This work will include the repair and partial reconstruction of three steam manholes in the westbound lane of Rollins St. The reconstruction will require an excavation of 14' which will extend into the eastbound lane of Rollins. This utility work and associated road closing will be complete prior to the students return in August.

Sincerely,

Jennifer Sullivan, P.E.  
Project Manager, Campus Facilities
