

We need to provide rebates for reduction in GHG by residential and commercial entities.

The Natural Gas task group recommends that CEC pass this statement

**The Climate and Environment Commission recommends that CWL initiate a rebate based upon the quantity of GHG reduction that will be achieved by replacing natural gas using equipment with electricity using equipment.**

In Residential and most Commercial buildings the major change will be replacing natural gas furnaces with heat pumps. Two other natural gas uses (NG) are water heating and cooking but these are much smaller uses.
