Crestridge Drive Culvert Replacement Project Communication with Interested Parties Interested Party & Address Date Method Comments Julia & Ryan Mudd 2025 Crestridge Dr **Destiny Thomas & Corrine** 2019 Crestridge Dr Diblasi Owner Resident 2019 Crestridge Dr Joseph and Danielle Schaefer 2015 Crestridge Dr Thomas Reilly 2011 Crestridge Dr Interested Parties (IP) meeting notification and the concept plan were sent to property 4/7/2022 Mail Pauline Landhuis 2007 Crestridge Dr owners, tenants and City representatives. 2003 Crestridge Dr Jaco & Mendy Bowlby 2000 College Park Dr Lawrence & Pamela Gibb 2015 Ridgemont Vicki Faurot 2014 Crestridge Dr Thomas Amolsch Anna Hamilton 2018 Crestridge Dr Katherine & Andrew Johnson 2022 Crestridge Dr Lawrence Gibb 2000 Crestridge (Residents of the area who would not be able to attend the IP meeting suggested meeting before it.) Neigbors in attendance were supportive of the project. Concerned about tree Jacob Bowlby 2003 Crestridge loss. Also expressed some concern as to whether making the culvert larger will increase 4/22/2022 In-person downstream erosion. Staff told them that more erosion cannot be ruled out, but that the 2014 Crestridge Thomas Amolsch engineer would be directed to configure the new culvert to make the water velocity as slow as possible. Vicki Faurot 2015 Ridgemont The two attendees to the IP meeting echoed the concerns their neighbors expressed. Also Thomas Reilly 2011 Crestridge noted that when the road is closed for the work some thought will need to be given to the In-person IP 5/4/2022 Meeting fact that the street is divided to the west of the closure. Some measures need to be taken 2015 Crestridge Danielle Schaefer to ensure access is maintained. Dr. Reilly called to ask about utility locates. I explained they were for surveying to locate Thomas Reilly 2011 Crestridge 1/5/2023 Phone the utilites on the project drawing. Called and let Mr. Gibb know that the flags showing up in the College Park Crestridge area were there so the surveyors working for our consultant could get utility locations on the 1/6/2023 Lawrence Gibb 2000 Crestridge Phone project drawing. Also noted that Water Dept would be potholing to get an elevation on their water line near the culvert and that a drilling rig would be out to collect geotech info. 2003 Crestridge Jacob Bowlby Thomas Amolsch 2014 Crestridge 1/6/2023 e-mail E-mailed same thing as above to residents for whom I have e-mail addresses 2015 Crestridge Danielle Schaefer Thomas Reilly 2011 Crestridge Met Ms Landhuis at her place to explain the concept plan and get her feedback. She is in favor of the project and the concept plan as of now. She understood that there may be a significant impact to the trees along the channel. She particularly wanted a tidy project --Pauli Landhuis 2007 Crestridge 5/18/2023 in-person no debris such as excavated materials or tree debris left for property owners to deal with. We discussed the need to relocate the sewer main and that we would try to do that in a way that allowed for the burial of her sewer lateral which now has an aerial channel crossing. Jacob Bowlby 2003 Crestridge Thomas Amolsch 2014 Crestridge E-mailed a sketch of the updated preliminary plan with an offer to meet and discuss, and Danielle Schaefer 2015 Crestridge 11/2/2023 e-mail noted that we intend to go to Public Hearing soon. 2011 Crestridge Thomas Reilly Pauli Landhuis 2007 Crestridge Met Mr. Bowlby to explain how relocating the sewer main might affect his sewer lateral. Jacob Bowlby 2003 Crestridge 11/2/2023 in-person Mr. Bowlby wanted to ensure that if ground is disturbed on his property, sod is used rather than seed to restore it.

Lawrence Gibb	2000 Crestridge	11/6/2023	in-person	Met Mr. Gibb to explain the concept plan that was sent, and to go over what was being done to address concerns that he had previously mentioned, especially the issue of whether the new culvert would make erosion worse on his property between Crestridge and Ridgemont. We explained how the choice of culvert (open bottom) and the lowering of the channel upstream of the culvert was done, in part, to help limit the velocity of stormwater as it leaves the ne culvert. Mr. Gibb suggested aligning the new culvert a little better with the downstream channel and strengthening the erosion control on the east side of the stream to counter the tendency of the water to dig into that part of the streambank. We agreed to look at that, keeping in mind that we are trying to preserve a large sycamore on the other side of the stream.
