Definition	Municipality/County	State
Data Center: An establishment engaging in the storage, management, processing, and/or transmission of digital data, and housing computer and/or network equipment, systems, servers, appliances, and other associated components related to digital data operations.	Loudon County	VA
Data processing facility means a facility where electronic data is processed by employees, including, without limitation, data entry, storage, conversion or analysis, subscription and credit card transaction processing, telephone sales and order collection, mail order and catalog sales, and mailing list preparation.	Boulder	CO
Data Processing and Computer Center An establishment that conducts computer programming, software development, and training, and services and maintains electronic data processing equipment.	Ann Arbor	MI
A facility containing one or more large-scale computer systems used for data storage and processing for off-site users. Typical supporting equipment includes back-up batteries and power generators, cooling units, fire suppression systems, and enhanced security features.	Fairfax County	VA
A use involving a building or premises in which the majority of the use is occupied by computers, telecommunications, or related equipment, including supporting equipment, where information is processed, transferred, and stored, as reflected in MCA § 69-3-1. (regulation of utilities)	Missoula	MT
"Data center" means real and personal property consisting of buildings or structures specifically designed or modified to house networked computers and data and transaction processing equipment and related infrastructure support equipment, including, without limitation, power and cooling equipment, used primarily to provide, as a service to persons other than the company operating the data center, data and transaction processing services, outsource information technology services and computer equipment colocation services, or, used primarily to provide, to a single user, including the user's affiliates, customers, lessees, vendors and other persons authorized by the user, data and transaction processing services.	New Albany	OH
Data Center A facility used primarily for the storage, management, processing, and transmission of digital data and that houses computer or network equipment, systems, servers, appliances, and other associated components related to digital data storage, processing, and related operations. Data center uses include data storage facilities, server farms, artificial intelligence training or processing, image processing, cloud computing, email servicing, and similar uses.	Lake County	IN
Data Center Accessory Use: Utilities, utility lines, electrical substations, pump stations, water towers, mechanical equipment and environmental controls (air conditioning or cooling towers, fire suppression, etc.), redundant/backup power supplies, redundant data communications connections, and high security when located on the same tract or assemblage of adjacent parcels developed as a unified development for a Data Center.6	Clearfield County	PA
Data center. A facility constructed and operated that is engaged in storage, management, processing, and transmission of digital data, including facilities used for cryptocurrency mining, which houses networked computer systems along with supporting equipment such as batteries, back-up power generators, HVAC and cooling systems. A data center does not include a dwelling unit used for home digital asset mining as defined by Ark. Code Ann. §14-1-501, et seq.	Fayetteville	AR
Data Center means a facility used primarily for the storage, management, processing, and transmission of digital data, which houses computer and/or network equipment, systems, servers, appliances and other associated components related to digital data operations. A facility may also include air handlers, power generators, water cooling and storage facilities, utility substations, and other associated utility infrastructure to support the operations.	Chesterfield County	VA
Data centers: An establishment or facility used for the storage, management, processing, and transmission of digital data, which may include the housing of computer and/or network equipment, systems, servers, appliances, and other associated equipment or components related to digital data operations. Supporting equipment may include back-up batteries and power generators, air handlers, water cooling and storage facilities, utility substations, and other associated utility infrastructure to support operations. This definition does not include server rooms or information technology infrastructure that is accessory to the principal use of the site.	Harrisonburg	VA
A building dedicated to the storage, management, processing, and/or transmission of digital data, including supporting equipment related to digital data operations.	Kansas City	MO
