RE: 900 S. Providence, Burnam Sidewalk Closure

Dear Mayor and City Council:

On behalf of MU Association of Delta Gamma, we have prepared the attached pedestrian control plan to the construction of the new building at 900 S. Providence. This plan includes a request to reroute the sidewalk along Burnam Avenue from May 23, 2016, through August 4, 2017.

This project has a significant amount of underground excavation and extensive utility work. In order to construct the project, and more importantly, protect public safety to the best of our ability, we are requesting this rerouting and sidewalk closure be approved. It provides alternate means of pedestrian routing for the upcoming year.

The following items have been considered in planning for this rerouting:

- Neighbors have been contacted. Attached you will find a sample letter mailed out to the affected neighbors along the block of construction
- Neighbors have been offered an open line of communication that will be maintained throughout the construction process.
- All interested parties and emergency services will be notified should the planned work proceed faster than anticipated, and when sidewalks are reopened.

We hope to minimize the need for closures, but the safety of both pedestrians will remain our foremost priority throughout the construction process. Should you have any questions or concerns, please contact me at 573-447-0292 or by email at jstephens@crockettengineering.com.

Sincerely,

A handwritten signature in black ink that reads "Jesse Stephens". The signature is written in a cursive, flowing style.
