Re: Accepting the Downtown CID Compactor Location Master Plan

Executive Summary

Staff has prepared for Council consideration a resolution to accept the Downtown CID Compactor Location Master Plan. The purpose of this Downtown CID Compactor Location Master Plan is to formally establish trash compactors locations within the CID.

Discussion

The Solid Waste Utility provides trash and recycling collection services within the Downtown Community Improvement District (CID) based upon the common use of trash containers, trash compactors and recycling containers, rather than individual account service. In the early 1990s, the Solid Waste Utility began installing trash compactors in lieu of trash dumpsters in the CID because the compactors are a much more efficient method of trash collection. A trash compactor has the same volume as approximately thirty (30) trash dumpsters.

Over the past 15 months, Solid Waste staff has been working with the Downtown CID to develop a Downtown CID Compactor Location Master Plan. The intent of the proposed Master Plan is to enhance solid waste services in the CID by identifying the optimum location for trash compactors, throughout the CID, locating them in places convenient to the greatest number of customers, while minimizing cost to the City and CID customers.

The master plan development started with multiple walking tours of the existing compactor sites with Solid Waste staff and members of the CID Economic Development/Solid Waste Committee. Draft versions of the master plan were then presented and discussed at numerous monthly CID Economic Development/Solid Waste Committee meetings.

An Interested Parties meeting for the Master Plan was held on February 21, 2018. Individuals who attended the meeting voiced their support for the plan. A copy of the attendance list is attached.
