

Instructions for City of Columbia, Missouri Community Dashboard

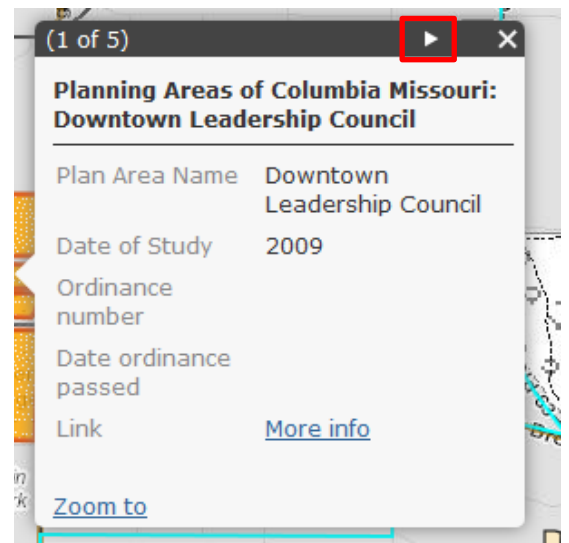

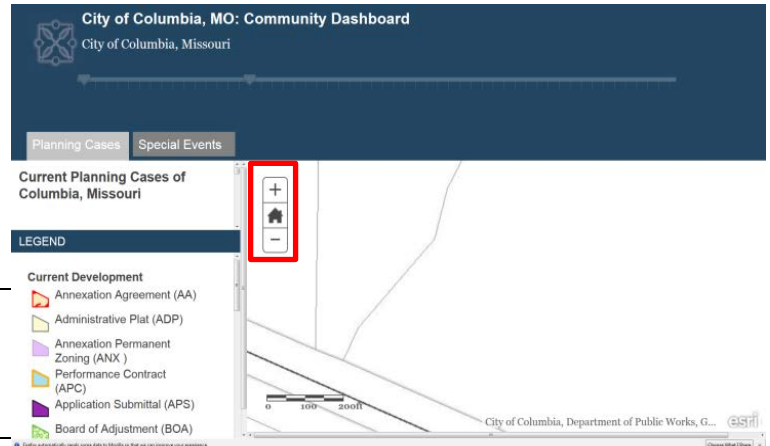

About the Community Dashboard

The Community Dashboard map is a portal showing transactional data, or data that changes every day as a part of business processes like planning cases, special events, projects, and permits, from business units across the City.

Click on the **tabs** to view different sets of information.

Tools

	Click to zoom in, or use the mouse wheel.
	Click to zoom out, or use the mouse wheel.
	Click to return you to the initial view and extent of the map.
	Clicking and holding the Left Mouse button and dragging in the map will pan to different areas.
	<p>Click on features in the map to return additional Information in a pop-up window.</p> <p>If multiple features are found when clicking in the map, click this button in the upper right corner of the pop-up window to view information about the other features.</p>

Timeline

The timeline is used to set a timeframe in the map, this is done by setting a **Start Time** (Left) and an **End Time** (Right) on the slide markers.

The timeframe is shown below the timeline in the map **Here**.

Contact

Contact information appears on each tab for specific questions about cases, permits, and projects.

Contact the City GIS Office via 874-7111 with general questions about the map, how it works, and the data it shows.
