

Department Source: City Utilities - Sewer/Stormwater

To: City Council

From: City Manager & Staff

Council Meeting Date: April 6, 2020

Re: Authorizing construction of the Leslie Lane Storm Water Improvement Project and calling for bids through the Purchasing Division and appropriating funds.

Executive Summary

Staff has prepared for Council consideration an ordinance authorizing construction and issuing a contract for the work or a bid call through the Purchasing Division for the construction of the Leslie Lane Storm Water Improvement Project, as shown on the attached diagram. The public hearing for this project was held on February 17, 2020. The resolution estimate for this project is \$150,000 and payment shall come from the Storm Water Utility funds. Funding will be appropriated from Annual Projects SS017 to Leslie Lane Storm Water Improvement Project SS147.

Discussion

The Leslie Lane Storm Water Improvement Project will consist of replacing 95 feet of 48-inch corrugated metal pipe (CMP) which is undersized and in poor condition. The project will also replace two undersized storm water inlets with larger inlets and replace 18 feet of failing 24-inch CMP. Utility and Public Works Staff is coordinating this project with the Leslie Lane Sidewalk Project.

Staff will evaluate existing term and supply contracts to construct this project. However, this ordinance authorizes construction either through the City's term and supply contracts or by bidding through Purchasing, whichever is most appropriate.

Storm Water Utility staff held an Interested Parties Meeting for this project on January 13, 2020. A public hearing for the Leslie Lane Storm Water Improvement Project was held on February 17, 2020. The resolution estimate for this project is \$150,000 and will be paid for from Storm Water Utility funds appropriated from the Storm Water Utility Annual Projects account.

Fiscal Impact

Short-Term Impact: The resolution estimate is \$150,000 and will be paid from Storm Water Utility funds.

Long-Term Impact: It is anticipated that this project will have a minimal impact on the Storm Water Utility's annual operating cost.

Strategic & Comprehensive Plan Impact

Strategic Plan Impacts:

Primary Impact: Infrastructure, Secondary Impact: Public Safety, Tertiary Impact: Operational Excellence

City of Columbia
