Re: Authorizing construction of Sanitary Sewer Rehabilitation #11 Project, calling for bids through the Purchasing Division or authorizing a contract for the work using a term and supply contract.

Executive Summary

Staff has prepared for Council consideration an ordinance authorizing construction and issuing a contract for the work or a bid call through the Purchasing division for the construction of the Sanitary Sewer Rehabilitation #11 Project. The public hearing for this project was held on December 2, 2024. The proposed sanitary sewer system improvements will consist of rehabilitation of approximately 120,000 linear feet of sewer line. The estimated cost of this project is approximately \$9,200,000 and will be paid from the Sewer Utility enterprise revenue funds.

Discussion

The scope of this proposed sanitary sewer system improvement project consists of rehabilitating sewer pipe, sanitary structures and lateral connections to the main. See the attached location map. Approximately 120,000 linear feet will be rehabilitated to repair structural deficiencies and to reduce Inflow and Infiltration (I&I) into the sewer main. The project is anticipated to begin in 2025.

The proposed rehabilitation project is a continuation of annual efforts to repair existing sewer infrastructure and reduce I&I as part of the Wastewater and Stormwater Integrated Management Plan. Work includes lining approximately 120,000 linear feet of aging sewer main identified by Sewer Utility staff during routine operation and maintenance activities. Many of these pipes are cracked or broken, nearing the point of failure. Rehabilitation of these lines will reduce inflow and infiltration (I&I) and the occurrence of stoppages. Reduction of I&I is part of the ongoing effort to reduce the number of backups into buildings and sanitary sewer overflows. Rehabilitation of sewer mains could occur throughout Columbia. The attached Project Graphic shows areas where several mains are proposed to be rehabilitated with this project including central, southwest, east campus and immediately north of I-70. This project will complete the rehabilitation of many areas previously started.

Staff anticipates utilizing an existing term and supply contract for this project. This ordinance authorizes constructing the improvements through the City's term and supply contracts or bidding through Purchasing, as necessary. An Interested Parties (IP) meeting was held on October 15, 2024. A public hearing was held on December 2, 2024. The estimate for this project is \$9,200,000 to be paid with Sewer Utility enterprise revenue funds.

Fiscal Impact

Short-Term Impact: \$9,200,00 to be paid from the Sewer Utility enterprise revenue funds
Long-Term Impact: Reduced maintenance and repair costs.

Strategic & Comprehensive Plan Impact

Strategic Plan Impacts:

Primary Impact: Reliable and Sustainable Infrastructure, Secondary Impact: Not Applicable, Tertiary Impact: Not Applicable

Comprehensive Plan Impacts:

Primary Impact: Infrastructure, Secondary Impact: Environmental Management, Tertiary Impact: Not Applicable
