

City of Columbia, Missouri Understanding City Cash Funds

This handout explains how the City of Columbia manages its money across three main types of funds. These funds are similar to how a household might separate money into different accounts for everyday bills, savings, or specific purposes.

Operating Cash

Think of this like the City's **checking account**. It pays for everyday services such as police, fire, utilities, trash pickup, and parks. This is the money that keeps the City running day-to-day.

Restricted Cash

This is money the City **cannot spend freely**. Laws, contracts, or rules limit how it can be used. Examples include federal relief funds (like ARPA), money set aside to pay debts, or customer utility deposits. It is like money set aside for a specific purpose, such as a gift card or college fund.

Capital Project Funding

This is money set aside for **big, long-term investments** such as building and improving things like roads, water systems, parks, public safety facilities, and the airport. It doesn't pay for salaries or bills; instead, it builds the community for the future.

Type of Cash	City Purpose	Household Example
Operating Cash	Daily services and operations	Checking account for bills & groceries
Restricted Cash Legally or contractually limited funds		Gift card or college fund
Capital Project Funding	Building & long-term improvements	Savings for a car or home remodel

City of Columbia Cash Balance as of 9-30-2025

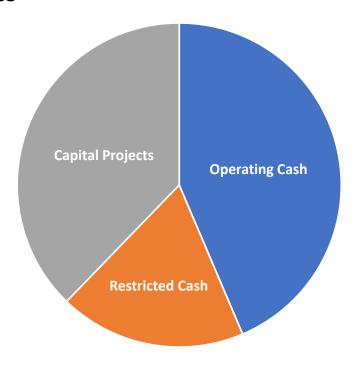

Operating Cash saw a quarter to date (QTD) increase of 23%. The General Fund had a QTD increase of 34%. This was largely the result of the \$14 million from the settlement from CenturyLink litigation. Non-Utility Funds had a QTD increase of 31%. The biggest driver of this increase came from Public Transportation receiving its annual FTA grant this quarter. Utility also saw a large (27%) QTD increase. This is common for the 4th quarter when revenues for Electric and Water are usually high due to the summer months.

Restricted Cash saw a QTD decrease of 13%. This was largely due to the annual bond principal and interest payments, which caused Debt Obligations to decrease by 34%. The other factor in the decrease was the spending down of ARPA funds. Which decreased by 12%.

Capital Project Cash decreased QDT by 5%. This is typical for the third quarter as projects for the fiscal year are fully in development resulting in the spending down of capital cash reserves.

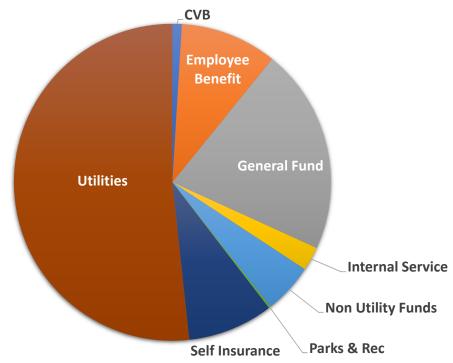

Total Cash Balance
