Comments:

The system appears to be comprehensive, secure, ethically constructed and an economic benefit to the department. Audit trail capabilities appear designed to demonstrate compliant use and enable coaching and learning. I recommend council authorize purchase after completing its own due diligence.

Very clear & very useful presentation. Clearly, much thought has gone into this expensive package and its benefits

Enjoyed the Axon presentation!

Any new technological advances that helps officers with efficiencies has to be a community plus. Lots of integration - a huge plus!!!
If I'm correct - this is a tool that would/might reduce the # of gun-related deaths. I understand that at times, guns firing a gun is necessary in the line of duty.

Note: I have no problem with the price tag associated with this IF it meets the needs of the CPD!

I appreciate efforts to decrease gun-related deaths via use of the tazers.

Comments:

This system should be a great upgrade
for CPD. It should lead to greater efficiencies
as well as both public & officer safety.
