The Risks of Inaction

Compromised safety	Without enhanced situational awareness, both officers and the community face increased danger, potentially leading to tragic outcomes.
Operational Inefficiencies	Relying on outdated practices hampers effective response to emergent needs, resulting in slower response times and poor resource allocation.
Eroded public trust	Failure to adapt to societal shifts further damages the relationship between law enforcement and the public, undermining effective policing.
Missed tech benefits	Such as decreased response times, fewer use-of-force incidents, better decision-making and optimized resource allocation.
Increased risk	Outdated technology exposes communities to higher crime rates and greater difficulty responding to critical incidents.

Axon Is Committed to Helping Agencies Safeguard Communities

Connected Ecosystem
Connected hardware, software and training provides holistic public safety solutions.

Assembled in USA
Axon products are assembled at our headquarters in Scottsdale, AZ, with millions successfully deployed and tested in the field.

Technology Agnostic
With over 75 partners, Axon makes interoperability simple.

24/7 Customer Support
Axon also provides each agency with a Customer Success Manager, a dedicated individual to assist agencies and communities.

The Ethics and Equity Advisory Council (EEAC)
Axon's EEAC is an independent group of leaders, advocates, and academics guiding the responsible development of new technologies.

Information Sharing Across the Entire Criminal Justice System
From capture to courtroom, the Axon platform streamlines information sharing to accelerate justice.
