Re: Small Lots – Proposed use-specific standards/UDC amendments

During the April 4, 2024 work session, Commissioners discussed the development of use-specific standards that would be applicable when new developments containing small lots were proposed. At the April 18, 2024 work session, staff presented proposed use-specific standards addressing the topics of “lack of open space” and “lack of diversity”. Staff continues to review the UDC for locations or cross-references to existing provisions that may be capable of being modified to address the remaining four topic areas shown below.

1. Avoid having parking requirements drive the form of development.
2. Encourage “cohesion” within and between developments such that differences in scale are minimized.
3. Encourage variety in housing styles and topologies (i.e missing middle, bungalow court, MUSE).
4. Require installation of sidewalks and street trees to activate the frontage and create “desired” walkability.

As of producing the agenda for the May 9, 2024 work session and regular Planning Commission meetings staff was unable to prepare proposed use-specific standard text for Commissioner review. Proposed text will be prepared and distributed at the beginning of the upcoming work session.
