\* **Crystal Lake:** The City curtailed 31% more in the third quarter than last year for Contract 1 and 34% more for Contract 2. We told them to stop generating because the price got below the negative production tax credit price (because of congestion).

\* **Jeff City Landfill (Ameresco):** reduced due to high temps and low moisture most of the last 3 months. In addition, they have only been running 1 or 2 units most of the time and were offline completely for a stretch in September.
