

The Mid-Missouri Radio Control Association, MMRCA

General Information

Flying Activity for 2021 from Pilots' Log

The months of May, June and July have the most number of days flown (9 days for May, 11 days for June, 9 for July). The remaining months had 8 or less days of flying.

Additionally, flying seldom occurs all day. Club rules prevent fuel powered aircraft (the louder planes) from starting before 9:30 AM. Typically flying of fuel powered aircraft starts much later than that, and ends well before dusk.

MMRCA members flew a total of 76 days in 2021

- March 3,4,5 and 6th
- April 4,22,25 and 30th
- May 1,5,10,13,14,23,24,29 and 31st
- June 1,2,3,5,8,10,11,13,15,19, and 22nd
- July 4,5,7,9,13,20,21,26, and 27th
- August 1,2,3,4,5,19, and 22nd
- September 2,5,9,17,19,25,29, and 30th
- October 1,4,6,8,12,17,20, and 23rd
- November 4,8,10,16,20,22,28 and 30th
- December 1,2,3,8,13,19,20 and 31

Information About Our Models

- Safety is paramount! All our members' models comply with the [guidelines](#) of the Academy of Model Aeronautics (AMA).
- All internal combustion engines have a muffler. (Electric motors don't need mufflers)
- Our club embraces the AMA's [Noise Abatement Recommendations](#)
- We have a wide range of sizes of airframes:
 - Our heaviest airframes are at most 55 pounds (AMA limits aircraft to 55 lbs, beyond which special certification, inspections and additional safety requirements are required).
 - The larger planes are typically 20-30 lbs.
 - For the medium size aircraft we're probably about 8-13 lbs.
 - Many are a smaller size, probably 6-8 pounds, or less.
- Operating altitudes: Our club members understand and respect the rules of the Federal Aviation Administration and the Academy of Model Aeronautics. Almost all of our flying occurs below about 400 feet. Our planes could fly higher, but most are far too small to see, and thus control, at those heights.
