Dr. Bowders,

Thanks for the comments.

I am including Andrew Briedwell of our staff on this email since he is managing this project.

Should you have any further questions or comments please let Andrew or myself know.

Thanks.

Jacob Ray, P.E.
Traffic Engineering Supervisor
Public Works Department

Good morning Jacob,

This is John Bowders. I live at 1342 Overhill Road. I drive my car and ride my handbike on the roads slated for traffic calming: Ridgefield Road, Ridgement and Highridge Drives. I made some notes on the attached pdf file and explain below:

1. Sheet 3 of 9: Ridgement – College Park intersection:
 - a. The County House trail crosses at-grade at this intersection
 - b. The proposed speed hump at the Ridgement – CoachLamp intersection is not the best location.
 - i. With the new homes along the south side of Ridgement, there are often cars parked along the south side of Ridgement. This narrows the street and effectively slows the traffic on Ridgement.
 - ii. Cars heading east on Ridgement will slow for the speed hump but then they will accelerate into the College Park – Ridgement intersection (and County House trail crossing).
 - c. The proposed speed hump on Ridgement just to the east of 1907 residence will result in a similar 'acceleration' into the Ridgement – College Park intersection (also crossing the County House trail).
 - d. Cars heading west on Ridgement do not have a clear vision of trail users heading south along College Park. Trail users can just 'pop into view' at the last minute as vehicles approach the intersection from the east.
 - e. The orientation of the home at 2014 Ridgement is very unfortunate. Residents are exiting their driveway practically entering the intersection and definitely blinding eastbound vehicles from seeing trail users crossing Ridgement.

f. I suggest you consider eliminating both speed humps and installing a 3-way stop at the Ridgement – College Park intersection. This is the safest alternative for County House trail users at the at-grade crossing of Ridgemont. It will also serve to slow the traffic on Ridgemont.

1. Sheet 5 of 9: Highridge – Mills intersection:

- a. The speed hump proposed for Highridge in front of 1607 Highridge should be relocated. There are always numerous cars often parked on both sides of the Highridge Drive beginning at Mills and extending past the proposed location of the speed hump. I believe that some of the parked vehicles are employees of the businesses located in the strip mall between Mills and Forum Blvd.
- b. A speed hump would be more effective located further away from the Mills – Highridge intersection.

Jacob, thank you for sending out the information about the proposed actions. I am happy to meet with you to further discuss my concerns if you have any questions about my comments.

Best regards, jjb

John Bowders

Public Comment Form

Ridgefield Road, Ridgemont and Highridge Drive traffic calming

We would appreciate hearing your thoughts about this project. Please write legibly, include your complete mailing address, and sign your comment form.

Comment forms can be mailed to: **Andrew Briedwell
Public Works Department
City of Columbia
PO Box 6015
Columbia, MO 65205**

Comments may also be faxed to... **573.449.9641**
or forwarded via E-mail to... **Pubw@CoMo.gov**
(please include "Ridgefield Road, Ridgemont and Highridge Drive traffic calming" in the subject line and provide your name and complete mailing address)

- I support traffic calming being installed on these streets !!
- Traffic Calming wouldn't bother me if it were implemented.
- I do NOT support traffic calming being installed on these streets

We are accepting comments until Sept. 30, 2022. Thank you for your input!

Comments: It is getting dangerous to simply let my dog out. People FLY on this road. My 4Runner was recently parked on the street in front of 1607 Highridge DR and someone hit it while flying → they totaled my car! Something needs done badly. Not sure what would work aside from speed bumps.

There is more space on the back of this form.

** The personal information requested below is not required and could be made available to the public.

NO + thanks

Melodi,

The current proposed plan for traffic calming can be found here:
como.gov/webapps/cipweb/downloadfile.php?id=3359

The current proposed plan for calming includes 6 speed humps on Ridgefield Rd., 8 speed humps and 1 speed table on Ridgemont and Highridge Dr., and 1 speed hump on Ridgemont between Highridge Dr. and Highridge Cir. We are also proposing improvements to the crosswalk at Ridgemont and College Park Dr.

Thanks,
Andrew Briedwell, P.E.

Hi Andrew,

So what is going to be done to calm the traffic? Because it is getting absolutely out of hand and worsens by the day. It is truly dangerous to drive, park, or walk around the neighborhood because people do not abide by the speed limit signs.

I already filled out that form and mailed it to you directly so hopefully you got that. Just a re-iteration on that form, my old 4runner was recently totaled on this street due to someone driving at a ridiculous speed and hitting my parked vehicle in front of my house.

Thank you,
Melodi Brant
1607 Highridge Dr

Hi Melodi,

The diagrams shown at the meeting can be found on the project webpage at this link:

https://www.como.gov/webapps/cipweb/display_project.php?project_id=2253

During the meeting, there was general discussion regarding snow and the effect of speed humps on driving in the snow, as well as concerns with the crosswalk at College Park Dr. and Ridgemont. If you have any questions or concerns, please let me know and I will answer them for you.

There is also a comment form on the webpage. If you have comments for the project, you can complete that form and email it back to me or put your comments directly in an email and I will add them to the record. The project will continue to be developed as we receive comments through the end of the month.

Thanks,
Andrew Briedwell, P.E.

Dear Sirs and Madams,

I live on Ridgefield, the last six years. I liked the area because is was peaceful, generally quiet, with meandering roads and well kept homes.

There is, probably, too much traffic because our streets have become routes between larger and more traveled streets. But, we can't do much about that.

I was unable to attend an early meeting on traffic calming in my area and I don't know if I will be able to attend the upcoming one. Obviously, I don't know the results of the previous meeting; but, I'd like to. Are there minutes, notes, whatever available?

If I can't come, I would like to restate and opine my response to the topic. No, no, no. I do not like speed bumps/speed tables/sleeping policemen. Think of your budget and your deficit and don't do it. Try anything else that does not three-dimensionally alter the road surface. Try more speed limits signs and/or intersection striping or sidewalks, etc.. Try radio and tv and/or school education. The neighborhood doesn't benefit from speed tables. They're a nuisance and ineffective. The only benefit is to chiropractors, osteopaths, massage therapists, physical therapists, and mechanics. On that note, maintain and repair our streets. Was happy to see what resurfacing has been...to make a smooth ride. More appreciative of that than wasting money on calming.

To me the current speed tables in town are an anathema and should be removed, not proliferated. Education is a better long tibudget for whatever reasoning is behind this plan...and less government spending and keeping to a budget.

Sincerely

David Gold

To: andrew.briedwell@como.gov

Thank you for the response; it's a regrettable one...but, appreciated.

I have outoftowners coming about when the meeting is; regrettably I may not be able to attend, again.

But, for the record, I thoroughfare-illy am against speed tables in the neighborhood.

I walk and drive regularly in the area and see other walkers, dog walkers, runners, families and pram pushers and rarely see a problem.

Consider it a waste of money, an inconvenience and unnecessary. Their installation is not progress, nor will be useful.

David Gold

We are accepting comments until Sept. 30, 2022. Thank you for your input!

Comments:

I'd support any measure to slow and reduce traffic on Highridge/Ridgemont. The road has become a thoroughfare despite not being designed as such. I live on the east end of Highridge and feel obligated to warn everyone coming to my house to avoid parking in the street and generally beware traffic. The traffic study seems to have collected speed/volume data further west on Highridge, but I can tell you drivers turn off of Mills Drive onto Highridge at excessive speeds by any measure. It's legitimately dangerous to pedestrians, property and animals. Hopefully traffic calming will include some infrastructure near the Highridge / Mills intersection. It would be greatly appreciated. Thanks for your time!

Comments: *the proposed speed bump near Ridgemon and Woodridge is unnecessary. Westbound traffic currently brakes at that location. It would pose a significant hinderance to Eastbound traffic during snow events. Eastbound vehicles need to maintain momentum to make it up the hill during the typical 2-3 days before the priority streets are cleared.*

Comments: Please do not add the speed bump near Ridgemont and Woodridge. SO MANY vehicles will have more trouble getting up our hill in the winter. We will be trapped!! Even emergency vehicles have been stuck (fire engine) It takes days to get our road cleared even though its a "priority" route!

Thank you for contacting the City of Columbia. I have forwarded your comments to the engineer working on this project.

On Mon, Sep 19, 2022 at 11:11 AM Robert Overmann <bob.overmann@gmail.com> wrote:

Hi Columbia Public Works team:

I'm emailing to share input on the proposed traffic calming project at Ridgefield, Ridgemont, and Highridge Dr.

My wife and I live at [1811 Highridge Dr, Columbia, MO 65203](#). Our street is frequently used by pedestrians and cyclists (including ourselves). Drivers often exceed the speed limit and fail to give cyclists/pedestrians adequate space on the road.

I would like to see both a sidewalk and a bicycle lane installed on Highridge. I also suggest speed bumps be added (except on the Highridge hill, where I understand speed bumps would present a safety issue).

I support on-street parking, as it slows traffic down by narrowing the usable road. However, I would not want vehicles to be allowed to park in the bicycle lane.

Unfortunately, I believe my home and those near it are set back the minimum distance from the road. Therefore, I would either want to see a single side walk installed on the other side of the street, where there is ample room, or to see the sidewalk installed in the existing road (narrowing it, which would slow traffic).

Thank you for considering my input.

Best,

Robert Overmann

Comments:

My family and i have lived on ridgemont for almost 25 years bottom of hill towards overhill rd. Throughout our stay here on ridgemont, we have raised kids and it has been safe road. Calming traffic with 10 bumps on Ridgefield Road/Ridgemont/Highridge roads is a little excessive in my my humble opinion. Perhaps a single bump at junction of college park and ridgemont may be necessary. Otherwise I am opposed to all those bumps.

Comments:

I have lived on Ridgemont since May 2003 (19 years home owner) and do not support the calming structures being proposed

on Ridgemont because of the following reasons; The overall terrain is already hazardous especially in the winter with the changes in how roads are cleared in the winter of late. All ways out from my house are uphill and I wonder how during the winter, the drive up hill will be in the winter. Winter road clearing and cleaning in the last 5 years has not been adequate proposed bumps are an overkill and will make the road more hazardous than it is now. In all

I have lived on Ridgemont since May 2003 (19 years home owner) and do not support the calming structures being proposed

on Ridgemont because of the following reasons; The overall terrain is already hazardous

especially in the winter with the changes in how roads are cleared in the winter

of late. All ways out from my house are uphill and I wonder how during the winter,

the drive up hill will be in the winter. Winter road clearing and cleaning in the last 5 years has not been adequate

and I can see driving conditions being terrible to drive on in the winter if after every 400ft there is an obstacle.

I am not an engineer but I do not see the value added by putting all

those bumps on Ridgemont. I do not know of people getting hurt on this stretch of the road in all my 19 years

living here. Please reconsider the options available. If anything I see only 2 areas

that they may be needed. One down the hill from Highridge and the second one on the downhill on Ridgemont.

I am willing to compromise on those two areas down the hill if studies show that we need them but every

400 ft is going to make it more dangerous out here especially in the winter which causes a lot of

concern. Please use the funds available to improve the road, there are many areas that

need repair instead of the speed bumps.

Subject: [PubW]: Ridgefield Road, Ridgemont, and Highridge Drive traffic calming
To: <PubW@como.gov>

Hello,

This is in regard to the letter dated 8/22/22 regarding the above project. My husband and I reside (and have for 28 years) on the 1700 block of Ridgemont at the crest of the hill and have noticed vehicles traveling very fast up and down the road. We are concerned for pedestrians and other vehicles. We are unable to attend the meeting on 9/15/22 and wanted to express our concerns.

Thank you!

I am writing today to express my concerns regarding the speed humps being planned in the Highridge-Ridgemont-Ridgefield Traffic Calming (HRRTC) project. I own the residence at 2318 Ridgemont. As the project is planned at this time, there will be nine speed humps between my home and Frum Boulevard, all within seven tenths of a mile. This seems excessive and I feel this plan needs reconsideration. No alternative traffic calming devices seem to have been considered for this project.

Comparing this project to other traffic calming projects I have noticed differences. The West Rollins project has a speed limit of 25 MPH and speed humps rated 25 MPH. This HRRTC project has a speed limit of 25 MPH but the speed humps are rated **20 MPH**.

Please consider the effects of vertical traffic calming on Ridgemont during winter weather. As you can imagine, descending one of the hills on Ridgemont during winter weather can be treacherous. Having to brake in icy conditions for a speed bump while also negotiating your descent down a hill adds to the risk of losing control of your vehicle. Ascending a hill on Ridgemont would be more difficult to maintain momentum in icy weather with speed bumps. This would make Ridgemont more dangerous for myself and neighbors.

Additional points of concern are that these vertical traffic calming devices add to city expenditures such as road construction and extra signage that could be spent on more pressing needs. Speed bumps lead to extra noise and visual pollution and the wear and tear of vehicles. There are longer response times for emergency vehicles and rougher return trips for patients going to hospital.

Thank you for your consideration in this matter.

Comments:

I support the speed table at Ridgemont and Coachlamp Court. My question is: Given volume of traffic, could a better crosswalk from College Park Drive to County House Trail be included when the bridge over Ridgemont is replaced?
