Council Meeting Date: May 1, 2023

Re: Setting a Public Hearing: proposed construction of storm water improvements at Ross Street and South Williams Street

Executive Summary

Staff has prepared for Council consideration a resolution setting a public hearing on June 5, 2023 concerning the replacement and improvement of public storm drainage infrastructure on Ross Street and South Williams Street. The project location is shown on the attached Location Map. An interested parties meeting was held on December 7, 2022. The resolution estimate for this project is \$240,000 and will be paid from Storm Water Utility funds.

Discussion

The Ross Street Stormwater Extension project will consist of constructing approximately 190 feet of stormwater pipe and three (3) stormwater structures. The proposed plan will improve stormwater management in the area and remove failing structures; see attached Project Graphic. The existing storm water system between Ross Street and Williams Street is in poor condition. A portion of the existing stormwater system runs under the corner of the home at 1512 Ross Street. The stormwater system under this home will be abandoned due to its age and location, and the proposed stormwater pipe will be rerouted around the existing homes. The downstream portion of the project includes a pipe extension and removal of the failing concrete stormwater conveyance.

An Interested Parties (IP) Meeting was held on December 7, 2022, at City Hall. One property owner attended the meeting and was in support of this project. The resolution estimate for this project is \$240,000 and will be paid from Storm Water Utility funds.

Fiscal Impact

Short-Term Impact: The resolution estimate is \$240,000.

Long-Term Impact: Minimal impact to operations costs, reduction in potential to respond to failures.

Strategic & Comprehensive Plan Impact

[Strategic Plan Impacts:](#)

Primary Impact: Reliable Infrastructure, Secondary Impact: Not Applicable, Tertiary Impact: Not Applicable

[Comprehensive Plan Impacts:](#)

Primary Impact: Infrastructure, Secondary Impact: Environmental Management, Tertiary Impact: Not Applicable
